Power Up!

Now that **Chris Bieniek** has assembled his "dream team" of editors whose last names end with "n", his next project is to move all of his freelance writers into one big house. "I don't know if Pat's wife would dig it," he muses, "but think how much money we'd save on postage. It'd be like an episode of *The Real World*, but with a lot more video games."
Current Favorite Games: Mario Tennis, XTreme Sports, Madden NFL 2001, Spider-Man

Anatole Brown would be happier if working at *Tips & Tricks* was more like *Road Rules*; imagine if the staff wrote, photographed, edited and laid out an entire issue while traveling in a big Winnebago on its way to the east coast. We'd eat Wetzel's Pretzels every day and liberate all of the NES games from Funcoland stores from coast to coast.
Current Favorite Games: Madden NFL 2001, The Legend of Zelda: Majora's Mask, Jet Grind Radio, The World is Not Enough

Art Director **Lisa Beattie** was unhappy with the mini-biography that was written in this space for this issue, so she sneakily changed it to this paragraph while the editors were busy playing *Madden NFL 2001*. Hi, Mom! She also thinks that Chris and Anatole have been watching too much MTV, and that she deserves some kind of salary increase.
Current Favorite Games: Jet Grind Radio, Chrono Cross, Ms. Pac-Man Maze Madness, Ultimate Fighting Championship

Having *Sabrina the Teenage Witch* join the WB line-up this fall was enough to fill Associate Editor **Jason Wilson** with glee. But when he found out that this season's cast was going to include Soleil Moon Frye—whom Jason has been enamored with since the *Punky Brewster* days—well, let's just say that his new nickname is "Mr. Happypants."
Current Favorite Games: Capcom vs. SNK: Millennium Fight 2000, Donkey Kong, The Grid, NFL 2K1

During a recent lunch at Tony Roma's restaurant, **Ara Shirinian** could be heard loudly extolling the virtues of Mr. T, whom he described as one of the most underrated actors of his generation. Each phrase that came out of Mr. T's mouth, says Ara, was every bit as quotable as the "I pity the fool" tagline that most people remember.
Current Favorite Games: Keyboardmania, Keyboardmania, Keyboardmania, Keyboardmania

Though photogenic as can be, Associate Editor **Charlotte Chen** recently declined to appear in the *Tips & Tricks* "Tip of the Week" segments of the *Electric Playground* TV show this season. "I'd rather die than be on TV," she stated flatly. Charlotte's favorite DVD features all three *Wallace & Gromit* short subjects on the same disc.
Current Favorite Games: Final Fantasy IX, Shenmue, Oddworld: Munch's Oddysee, Alone in the Dark: The New Nightmare

As Contributing Editor **Pat Reynolds**' obsession with the *Armored Core* series of games continues to grow, so does the real-life core that Pat has been secretly building in his garage. He plans to walk down St. Joe Highway with it and scare the crap out whoever is unfortunate enough to have the early evening shift at the local Dairy Queen.
Current Favorite Games: Mario Tennis, Armored Core 2, Tony Hawk Pro Skater 2, Capcom vs. SNK: Millennium Battle 2000

Contributor **Geoff Arnold** would win the award for having the deepest voice of any current member of the *Tips & Tricks* staff, if there were such a thing. Frankly, it takes so long to write these stupid biographies every month that there's no way we'll ever waste our time giving out trophies to the staff for winning contests that they didn't even enter.
Current Favorite Games: Street Fighter III: 3rd Strike, Capcom vs. SNK: Millennium Battle 2000, Secret of Mana, Phantasy Star II

Rich Krupa (a.k.a. "Loopy Pottyhead") is a fan of Dav Pilkey's *Captain Underpants* books. Rich believes that the books' main characters—George Beard and Harold Hutchins—are named after "Stymie" Beard and "Wheezer" Hutchins from *Our Gang*...and that Jerome Horwitz Elementary School is named after Curly from the Three Stooges.
Current Favorite Games: Front Mission III, Marvel vs. Capcom 2, Capcom vs. SNK, Ghosts 'N Goblins

Tips & Tricks
8484 Wilshire Blvd.
Suite 900
Beverly Hills, CA 90211

We won't be able to help you out, but at least it will give you something to do.

SPOILER ALERT!

You are not the best magazine in the world, let me say that first and foremost. Want the reasons? Well, how about just one? You spoil games, that's reason enough. I got your September issue in the mail and opened it straight to the *Chrono Cross* strategy guide. I already own the game and the official guide, but I thought your guide would help give me better insight. As I read through, Ara Shirinian casually tells people that Serge becomes Lynx in the game. I, unfortunately, did not know this at the point I read your magazine. Considering I was looking forward to an intricate story (as well as finding out the connection between Lynx and Serge ON MY OWN) and enjoying all the twists myself, you can understand how I became quite upset. Upset doesn't even begin to describe it, I was ticked off. I was ticked off royally. People had said that *Chrono Cross* was the greatest RPG ever and now, you had blown one of the biggest secrets of the game for me. Thank you for almost completely ruining the experience. There are other values you have left unspoiled but still, what you did was inexcusable. I did not see any warning at all prior to reading through the guide and that is why I'm upset. There just wasn't any warning.

You say that you welcome constructive criticism so I'm calling your bluff right here. All I ask is that you have some kind of warning for readers to see clearly before they start reading your guides. You could take an example from other magazines and have a gigantic "Spoiler Alert" symbol plastered in bright colors next to or nearby the game's logo so it's one of the first things people see when they open up to the guides within. Because of your blunder, I had to call everyone I knew who wanted to enjoy this game and tell them not to pick up your September issue. I myself have not even touched it since I dropped it four days ago; I consider it bad karma now. It's fermenting on my bedroom floor. I myself am going so far as to cancel my subscription. I know this doesn't make much difference to you but I also know that I cannot possibly be the only one who had the game spoiled for them. I'm hoping that others may follow my example so as to teach you a lesson. I also know that I cannot blame Ara alone, the editors and people who proofread the guide are responsible as well. So to all of you responsible I say, "You should be beaten with a Whacking Stick until your skin is peeled from your back." Well, maybe that's a bit extreme but you get my point. So, if you hold true to your ideals, you will print this letter so I may be heard by more. Good day, good riddance.

—Lee Clark
Byron, MN

Ara Shirinian responds: I'm sorry you feel that way, Lee. You should know that in general, we're always conscious of giving away major plot points in games, and we always try to avoid it whenever possible. However, this was a special case. We could have neglected to tell you that Serge becomes Lynx, but we told you that when that event occurs, you would lose every single character that you've had in your party, and you wouldn't be able to get any of them back until you turn back to Serge (which is a long time later). It's always a shock when you're happily playing the game, collecting and building your party, and after some event you pass a point of no return where you lose almost everything. We did not reveal anything about why Serge turns into Lynx, or how it happens, and we certainly did not reveal the relationship between the two characters! We could use the term "Spoiler Alert," but—given the content of this magazine—we'd have to say it on practically every page! If you put your hand in the lion's mouth, do not be surprised if it gets bit! This is akin to the "Caution: Hot" labels that appear on coffee cups; frankly, we would rather not insult our readers' intelligence. They know what they're getting into when they read T&T...and as a subscriber, we're surprised that you don't. If you read a tips magazine that blows open all of the secrets in the games it covers, you run the risk of coming across information that's more than what you need to know.

If you're so sensitive that your enjoyment of Chrono Cross will be utterly destroyed by knowing that Serge turns into Lynx, you shouldn't be reading strategy guides or books about it in the first place. The bottom line is this: If we gave away something you didn't want to know about, we apologize. Surely other readers would have not wanted that information revealed to them. However, just as surely, other readers will have wanted to know if and when your party all but disappears halfway through the game. We err on the side of providing too much information, rather than too little. Do we dare deprive our readers of certain information just because a few people don't want to know about it? We would rather not spend our time agonizing over the possibility that somebody may get upset at the sight of some ostensibly taboo information that he or she seeks out himself.

Lynx has a mysterious past in *Chrono Cross*.

Stopping is a bad idea.

In a world of angry cops, rival taggers and lots of paint, it's important to keep moving. It's a race against time to leave your mark on the sprawling urban environment. Armed with skates, a radio and varying quiver of spray paints, it's you against the world. But you'd better be quick because the price of self expression just got higher.

The long-awaited crossover has finally arrived! By the time you read this, tournaments for this game are probably reaching your neighborhood, leaving you in desperate need of the latest tips and tactics on how to annihilate your opponent! This strategy guide will help you understand the concept of a game that combines both Capcom and SNK characters and transforms them into a setting that rivals any fighting game to date. Borrowing aspects from a multitude of fighting games—including (but not limited to) the *King of Fighters* series, *Super Street Fighter II*, *Street Fighter Alpha*, *Fatal Fury* and *Art of Fighting*—*Capcom vs. SNK* successfully uses old-school brawl tactics as its main focus without straying away from tried-and-true *Street Fighter* gameplay.

For the trivia fans among you, here's a breakdown of each company's characters and the games where they first appeared:

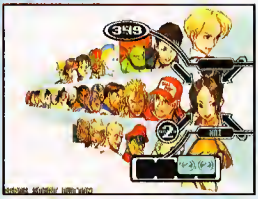
SNK Characters' first in-game appearances:

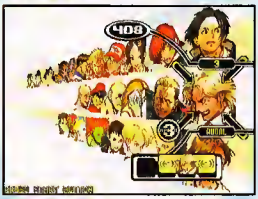
- *Fatal Fury*—Terry Bogard, Raiden (boss, not selectable), Geese (boss, not selectable)
- *Fatal Fury 2*—Kim, Mai, Raiden
- *Fatal Fury Special*—Geese
- *Real Bout Fatal Fury*—Yamazaki
- *Art of Fighting*—Ryo, King
- *Art of Fighting 2*—Yuri
- *The King of Fighters '94*—Kyo, Benimaru, Rugal (boss, not selectable)
- *The King of Fighters '95*—Iori, Rugal (secret character), Vice (background character only)
- *The King of Fighters '96*—Vice

Capcom Characters' first in-game appearances:

- *Street Fighter II*—Ryu, Ken, E. Honda, Balrog (boss, not selectable), Vega (boss, not selectable), M. Bison (boss, not selectable) Sagat (boss, not selectable), Guile, Dhalsim, Chun-Li, Zangief, Blanka
- *Street Fighter II: Champion Edition*—Balrog, Vega, Sagat, M. Bison
- *Super Street Fighter II: The New Challengers*—Cammy
- *Street Fighter Alpha 2*—Sakura

RATIO SYSTEM





The most complex part of the game is the ratio system. Each time you play the game, you will be allowed four "points;" each represents the level of power of each character chosen. With this, you can choose a multitude of characters: four Ratio 1 characters, a Ratio 3 and a Ratio 1, two Ratio 2 characters, or one Ratio 2 and two Ratio 1 characters. When the time-release characters become available, you can also pick one ratio 4 character. Depending on what type of player you are, you will need to practice with as many characters as possible to be efficient in designing a well balanced team.

You are only allowed one life bar for each character you choose, which greatly inhibits the player from dominating with just one character (as has been the case with previous *Street Fighter* games).

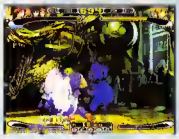
RATIOS

1. Weak Offense, Weak Defense
2. Average Offense, Average Defense
3. Strong Offense, Strong Defense
4. Strongest Offense, Strongest Defense

CAPCOM VS. SNK GROOVE

Before each match, after choosing your selection of team members, you will be asked what "groove" best suits your fighting style. The

CAPCOM GROOVE



Capcom groove is similar to the *Street Fighter Alpha* series of games, with up to three levels of Super Meter for use with each of your chosen characters' various Super Moves. The Super Meter in Capcom groove is increased by performing various special moves. However, when your Super Meter gauge increases, the damage that each regular or special move done increases, up to 15% more damage if the Super Meter gauge is at its maximum level of 3. This is essentially the same amount of damage done in SNK groove at its maximum level, but with the Capcom Super Meter increasing at a much slower pace. The SNK groove is a faster, more intense style of gameplay that is similar to Extra Mode in the *King of Fighters* series of games. By holding down the Hard Punch and Hard Kick buttons, your Super Meter increases quickly, allowing you to fill up your meter in a matter of seconds. You have a limited time to perform your Super Move after it is at its maximum level, and the damage done from this is minimal. However, each special move and standard move that connects on your opponent will actually do about 15% more damage than it would normally. Also, when your character's life bar is down to 25% of its capacity, you will have unlimited Super Moves at your disposal for the rest of the match. If you fill your Super Meter to its maximum level and connect with a Super Move under these conditions, you can initiate damage of up to 70% with one Super Move. SNK Groove is most dangerous when one of your team members has unlimited Supers at his disposal; this can greatly change the outcome of the match. Ultimately, to define the two grooves in simplistic terms: Capcom groove is for offensive minded players who are in the hunt for large combos, while SNK groove is for defensive players who tend to rely on comeback maneuvers as their main forté.

SNK GROOVE

THROWS AND TECH THROWS

Throwing your opponent is easier than ever! Back to the old-school days: throwing is done by pressing ← or → + Hard Punch or Hard Kick when close to your opponent. To tech out of a throw, perform the same maneuver to your opponent when you are about to be thrown.

SUPER MOVE LEVELS (CAPCOM GROOVE ONLY)

To activate various levels of your Super Meter up to its maximum level of 3, perform each character's specific Super Move and press Light Punch or Light Kick for level one, Hard Punch or Hard Kick for level two and both punches or both kick buttons simultaneously for level three.

ROLLING

When I first played *Capcom vs. SNK* and noticed that the characters can "roll"(as in the *King of Fighters* series), I was not too happy at first. But then I noticed that the roll (or dash move with some characters) that is done by pressing Light Punch and Short Kick simultaneously is *invincible* the moment the move is initiated. The roll goes through ALL special moves, Super Moves and projectiles! A rolling character is weakest near the end of a roll, where he or she can be victimized by a sweep or nailed by repeated flurries of crouching Light Punches or Light Kicks. A rule of thumb: Roll when you see your opponent roll! You will be safely transported to the other side of your opponent, which may help you avoid a series of attacks that will eventually lead to a Super Move. Another technique that can be executed involves rolling when your opponent is about to cross you up. This does not always work since certain characters do not have the ability to recover as quickly as others. Regardless, the roll allows you to move at your opponent in close quarters...and it increases the speed of gameplay somewhat, since the slow character speed can turn the game into a turtle's paradise. The characters with the fastest rolls are Sakura and Raiden. It is VERY difficult to effectively determine where the two rolls begin and end, allowing Sakura to perform her combo of choice and Raiden to perform a Power Bomb. Also, if your opponent tends to roll out of control, you can perform a throw maneuver by mashing ← or → + Fierce Punch upon seeing your opponent "roll."

BASIC MOVES

Roll—Light Punch + Light Kick simultaneously
Super Meter Charge (SNK Groove only)—Hard Punch + Hard Kick simultaneously
Throw—← or → + Fierce Punch or Hard Kick when close to your opponent
Tech Throw—← or → + Fierce Punch or Hard Kick when your opponent attempts to throw you.
Quick Jump—↓ ↗ or ↓ ↖
Dashing—← ← or → →

FOUR-BUTTON LAYOUT

Unlike all previous 2-D *Street Fighter* games, Capcom has implemented a four-button layout, with some of the missing Forward and Roundhouse Kick and Strong and Fierce Punch moves done by holding the joystick in either the neutral, defensive crouch, or offensive crouch positions. This may seem beneficial to players who have been using the traditional four-button control scheme in SNK fighting games for years, but it's not quite the same. It is not necessary to press both Light and Heavy buttons of either punch or kick to enable to strongest basic move for each character. Both Capcom and SNK fighting game veterans will have to get used to the new configuration in order to effectively use each character.

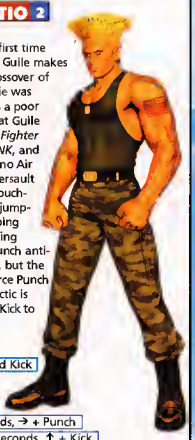
GUARD BREAK

Though there is no meter to display it properly, the Guard Break is similar to that of previous SNK games, most recently *Garou: Mark of the Wolves*. After a certain number of kicks and punches have been blocked by the opponent with no offense generated in return, the opponent's life bar will flash red, meaning that their "guard" will be broken soon and a free hit or combo is inevitable.

CHARACTERS

Listed on the following pages are special moves and techniques used with the Capcom characters (14 of the 28 selectable fighters). The SNK characters and mysterious hidden characters will be discussed in our next issue!

GUILE RATIO 2



Good 'ol Guile! This marks the first time since *Super Street Fighter II Turbo* that Guile makes an appearance in a non-"vs."-series crossover of *Street Fighter* in the arcade. Yes, Charlie was selectable in the *Alpha* series, but he is a poor rendition of the original Guile and what Guile players had been used to in the *Street Fighter* series. Guile flourishes in *Capcom vs. SNK*, and the results are dramatic. Since there is no Air Blocking option, obviously Guile's Somersault Kick is his weapon of choice. Even a crouching Hard Punch stops opponents from jumping in at you! Guile's old double-sweeping Roundhouse Kick is now done by pressing ↘ + Hard Kick. His crouching Strong Punch anti-air move has been completely omitted, but the addition of his powerful crouching Fierce Punch (Hard Punch) as a secondary anti-air tactic is golden, along with crouching Forward Kick to play footsie with your opponent.

Extended Normal Moves
- Double Roundhouse Sweep—↘ + Hard Kick
- Rolling Sobat—→ + Light Kick

Special Moves
- Sonic Boom—Charge ← for two seconds, → + Punch
- Somersault Kick— Charge ↓ for two seconds, ↑ + Kick

Super Moves
- Total Wipe Out—Charge ← for two seconds, → ← → + Punch
- Somersault Strike— Charge ↙ for two seconds, ↘, ↙, ↗ + Kick

RYU RATIO 2

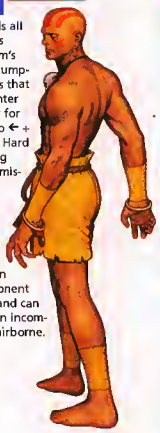
Because of the new rolling system, Ryu only suffers when throwing close projectiles at an opponent, since one can easily roll under a projectile upon sight. However, *Street Fighter II Turbo Hyper Fighting* fans can rejoice: Ryu's uppercut is semi-invincible again, his Hurricane Kick is still capable of high priority damage and it can easily fly over Sonic Booms from Guile upon reaction. Overall, Ryu is still one of the top characters in the game, as he has been in every *Street Fighter* game in existence. Ryu's best cross up move is Cross up Hard Kick, crouching Light Punch, crouching Light Kick, Hurricane Kick with Hard Kick. After this is successfully performed, you are in position to successfully perform the same combo once again; your opponent will have to learn to roll out of the way or block. Ryu's Roundhouse Sweep can be used in a chain combo after a jump-in hard kick and two crouching Light Kicks. Ryu can chain an air Tatsumaki Senpu Kyaku (hurricane kick) from a deep jump-in Light Kick. Use Ryu's Hop Kick to leap over Sagat's Low Tiger Shots as well.

Extended Normal Moves
- Overhead—→ + Light Punch
- Hop Kick—→ + Light Kick
- Roundhouse Sweep—↘ + Hard Kick

Special Moves
- Hadouken—↓ ↘ → + Punch
- Shouryuken—→ ↓ ↘ + Punch
- Tatsumaki Senpu Kyaku (can also be done in air)—↓ ↙ ← + Kick

Super Moves
- Shin Shouryuken—↓ ↘ → ↓ ↘ → + Kick
- Shin Hadouken—↓ ↘ → ↓ ↘ → + Punch
- Shin Tatsumaki Senpu Kyaku—↓ ↙ ← ↓ ↙ ← + Kick

DHALSIM RATIO 1



As a ratio 1 character, Dhalsim needs all the strength he can get. The removal of his Strong and Forward attacks inhibits Dhalsim's ability to effectively stop opponents from jumping in at certain angles. The normal attacks that Dhalsim was able to keep are his only counter against air attacks, either for a clean hit or for trading purposes. Strong Punch turned into ← + Hard Punch, Forward Kick turned into ← + Hard Kick and Dhalsim's original anti-air standing Jab Punch is a standing Light Punch. The omission of Dhalsim's Yoga Flame Super Move hurts him slightly, but he can still remove most of an opponent's life bar, setting up his remaining team members for an easier time than before. Dhalsim has only two "drill moves" left, but because the game engine disregards Air Blocking, Dhalsim can sweep his opponent with a slide if an opponent attempts to jump at him from a distance, and can use his Hard Punch Air Drill to knock out an incoming air move if Dhalsim himself is already airborne.

Extended Normal Moves

- Slide—↘ + Hard Kick
- Fierce Drill—↓ + Hard Punch (in air)
- Angle Drill—↓ + Hard Kick (in air)

Special Moves

- Yoga Fire—↓ ↘ → + Punch
- Yoga Flame—→ ↘ ↓ ↙ ← + Punch
- Yoga Blast—→ ↘ ↓ ↙ ← + Kick

Super Moves

- Yoga Stream—↓ ↘ → ↓ ↘ → + Punch
- Yoga Volcano—↓ ↘ → ↓ ↘ → + Kick

CHUN-LI RATIO 2

Since Chun-Li was toned down from her hyper and maniacal ways in *Street Fighter Alpha 2* to *Alpha 3*, some players have abandoned her. She still maintains a quick, aggressive style, but many of her moves from the *Alpha* series have been omitted here and her Kikoken is slower than molasses oozing from a bottle. It's best to use this move in a combo only. Her Spinning Bird Kick—which only made an appearance as an X Mode Specialty Move in *Street Fighter Alpha 3*—can go through projectiles, but is not as effective as it was in previous incarnations of *Street Fighter*. Her standing Hard Kick can be somewhat effective as an anti-air move; it works from a distance, but it's even better when it changes to its old format of a close Roundhouse Kick from *Street Fighter Alpha 2*. The problem is that it can only be done from a certain distance when your opponent is close enough to you, making it difficult to judge the spacing correctly without getting pummeled.

Extended Normal Moves

- Roundhouse Sweep—↘ + Hard Kick
- Heel Kick (in air)—↓ + Hard Kick
- Flip Kick—↘ + Light Kick

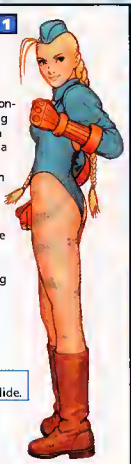
Special Moves

- Lightning Kick—Press any Kick button repeatedly
- Spinning Bird Kick—Charge ← for two seconds, → + Kick
- Tenshou Kyaku—Charge ↓ for two seconds, ↑ + Kick
- Kikouken—← ↙ ↓ ↘ → + Punch

Super Moves

- Senretsukyaku—Charge ← for two seconds, → ← → + Kick
- Hazan Tenshokyaku—Charge ↙ for two seconds, ↘, ↙, ↗ + Kick
- Kikosho—↓ ↘ → ↓ ↘ → + Punch

CAMMY RATIO 1



Normally a poking type of character, Cammy has been promoted to something of a cross-up queen as well! Her jumping Light Kick crosses up the opponent with ease, and can be connected with a standing Light Punch and crouching Short Kick two-in-one into a Cannon Spike for an easy four-hit combo! Cammy's Cannon Spike has a longer delay, making it difficult to determine when to knock your opponent out of the air with it from an attempted jump-in. Her standing Hard Kick still has great range up close, and Cammy can finally two-in-one her crouching Forward Kick (Hard Kick) into a Cannon Drill once again. Cammy is down to one Super Move—the Spindrive Smasher—but it can be comboed from almost any move in the game, even her crouching Roundhouse Kick! (↘ + Hard Kick)

Extended Normal Moves

- Roundhouse Sweep—↘ + Hard Kick

Special Moves

- Hooligan Combination—↓ ↘ → ↗ + Punch, any Punch button for Air Grab, any Kick button for Slide.
- Axel Spinning Knuckle—→ ↘ ↓ ↙ ← + Punch
- Cannon Spike—→ ↓ ↘ + Kick
- Cannon Drill—↓ ↘ → + Kick

Super Moves

- Spindrive Smasher—↓ ↘ → ↓ ↘ → + Kick

BLANKA RATIO 1

Blanka, easily one of the top-tier characters in *Street Fighter II Turbo Hyper Fighting*, is back to his top-tier ways in *Capcom vs. SNK*. He has the deceiving looks of his *Street Fighter Alpha 3* alter ego, but plays like a combination of the Blankas from *Super Street Fighter II Turbo* and *Hyper Fighting*. His strongest moves are his basic moves, literally. The standing Fierce Punch (an effective anti-air move) and jumping straight up in the air with Hard Kick are all you need to dominate with Blanka. You can fool your opponent into making mistakes if they roll at you; wait until the end of their roll, then have Blanka roll and immediately go into the motion for his Rolling Attack. I can't begin to tell you how effective this is, how many players fall for it and how risk-free it is against any opponent who fails to stop it with a standing Jab Punch! Regardless, Blanka should be on everyone's team. He is a free character with Ratio 2 strength, which is even more deadly if you add the extended damage feature that each character maintains at the maximum levels of your Super Gauge in both Capcom and SNK groove.

Extended Normal Moves

- Roundhouse Sweep—↘ + Hard Kick
- Double Head Butt—← + Hard Punch
- Double Knee—← + Light Kick
- Slide Attack—↘ + Hard Punch

Special Moves

- Rolling Attack—Charge ← for two seconds, → + Punch
- Back Step Rolling—Charge ← for two seconds, → + Kick
- Vertical Rolling— Charge ↓ for two seconds, ↑ + Kick
- Electric Thunder—Press any Punch button repeatedly
- Forward or Back Dash—← or → + both Kick buttons simultaneously

Super Moves

- Direct Lightning—Charge ← for two seconds, → ← → + Punch
- Shout of Earth—Charge ↙ for two seconds, ↘, ↙, ↗ + Punch

KEN RATIO 2

Ken benefits as well from the return to the old-school style of gameplay. He's similar to his *Street Fighter Alpha* (fast rolls) and *Street Fighter Alpha 2* (new kick maneuvers) counterparts. Ken's new Ryusen Kyaku kick has good priority, but cannot be done in a combo at all. Now with two different types of rolls, Ken can put on the pressure more than ever with his quick moves and random uppercut with no delay. Ken's Hadouken/Shouryuken trap only works at the end of the screen due to the game engine inhibiting projectile-heavy gameplay.

Extended Normal Moves

- Overhead Kick—→ + Light Kick
- Roundhouse Sweep—↘ + Hard Kick

Special Moves

- Hadouken—↓ ↘ → + Punch
- Shouryuken—→ ↓ ↘ + Punch
- Tatsumaki Senpu Kyaku (can also be done in air)—↓ ↙ ← + Kick
- Ryusen Kyaku—→ ↓ ↘ + Kick

Super Moves

- Shouryureppa—↓ ↘ → ↓ ↘ + Punch
- Shinryuken—↓ ↘ → ↓ ↘ + Kick
- Shitsupujinraikyaku—↓ ↙ ← ↓ ↙ ← + Kick

E. HONDA RATIO 2

E. Honda can still two-in-one from his crouching Light Kick and play a game of cross-up confusion with his flying sumo drop (Super Hyakken Otoshi)! Mix up these tactics by performing this maneuver with a Light Kick, then a Hard Kick. E. Honda's splash (jump in with Hard Kick) has high priority and his Super Zutsuki headbutt still maintains somewhat of an advantage as an effective anti-air counter. E. Honda plays much like his *Alpha 3* counterpart, but adds his overall technique from Super Street Fighter II Turbo in terms of effectiveness, only because of the omitted Air Blocking technique.

Extended Normal Moves

- Splash (in air)—↓ + Hard Kick

Special Moves

- Super Zutsuki—Charge ← for two seconds, → + Punch
- Super Hyakken Otoshi— Charge ↓ for two seconds, ↑ + Kick
- Oicho Slam—Rotate the joystick or D-pad 360° + any Punch button
- Hundred Hand Slap—Press any Punch button repeatedly

Super Moves

- Oni Muso—Charge ← for two seconds, → ← → + Punch
- Orochi Crush—(Level 3 Capcom groove or SNK groove MAX)—Rotate the joystick or D-pad 720° + Punch

BALROG RATIO 2

The strongest of the Ratio 2 characters—yes, that includes Zangief and Raiden—Balrog is another character along with Blanka that should be up for consideration on every person's team, just because of his strength and overall effectiveness. Balrog plays much better than he did in *Street Fighter Alpha 3*, more so like his *Super Street Fighter II Turbo* counterpart. The Buffalo Headbutt returns, but it does not go through projectiles anymore. His roll is actually a forward dash that goes through projectiles and other various moves, but looks like a dodging maneuver instead. Balrog players can sneakily perform a Buffalo Headbutt immediately following this, because it looks as though Balrog is not charging for this move. Normally, most players can see that Balrog must duck in order to "charge" for this move, but since Balrog's roll is actually a dash, it looks like he is moving freely at the opponent without a charge. Balrog can easily combine numerous crouching Light punches into a Dash Straight, or Dash Ground Straight, then shift toward the opponent and try again. There's a trick that will allow you to get the Dash Ground Straight to appear instantly and catch your opponent off-guard, making him or her think that you're not charging for any particular move. In essence, you are not; the "charge" will automatically be registered when Balrog rolls to the other side of an opponent. No you can easily perform the Dash Ground Straight just by holding the joystick in the offensive or defensive crouch position (depending on where your opponent is at the moment of intended impact). To make matters worse, Balrog's Super Dashing Straight has such high priority that he will almost always get a free hit in after it's blocked. Clearly one of the most complete characters in the game, and well-adjusted to the gameplay engine.

Extended Normal Moves

- Roundhouse Sweep—↘ + Hard Kick
- Anti Air Fierce Punch—↘ + Hard Punch

Special Moves

- Dash Straight—Charge ← for two seconds, → + Punch
- Buffalo Headbutt— Charge ↓ for two seconds, ↑ + Punch
- Dash Ground Straight—Charge ← for two seconds, ↘ + Punch
- Dash Uppercut—Charge ← for two seconds, → + Kick
- Turn Punch—Hold both Punch or Kick Buttons, release.

Super Moves

- Crazy Buffalo—Charge ← for two seconds, → ← → + Punch
- Gigaton Blow (Level 3 Capcom groove or SNK groove MAX)—Charge ← for two seconds, → ← → + Kick

ZANGIEF RATIO 2

Zangief suffers the most of any of the *Street Fighter* characters because he is missing not only his crouching Strong Punch anti-air move, but he is also lacking the ability to effectively get in close to an opponent and grab them without being knocked out of the air with some type of anti-air move. His crouching Hard Punch has no priority against players that rely on sweeps or other various low attacks; it can be easily countered. Zangief's main anti-air move is his Double Lariat with both Kick buttons...but getting close to an opponent is another story. Your main offensive strategy is to perform a Screw Piledriver on your opponent after using the rolling technique. Zangief's Vanishing Flat has lost its luster since rolls can go through projectiles, have no lag and are much more effective in setting up an offensive scheme anyway.

Special Moves

- Vanishing Flat—→ ↓ ↘ + Punch
- Screw Piledriver—Rotate the joystick or D-pad 360° + any Punch button
- Atomic Suplex—Rotate the joystick or D-pad 360° + any Kick button
- Power Bomb (far)—Rotate the joystick or D-pad 360° + Kick button
- Double Lariat (high)—Press both Punch buttons simultaneously
- Double Lariat (low)—Press both Kick buttons simultaneously

Super Moves

- Aerial Russian Slam—↓ ↘ → ↓ ↘ → + Kick
- Final Atomic Buster—Rotate the joystick or D-pad 720° + any Punch button

VEGA RATIO 3

Vega looks exactly like his *Alpha 3* counterpart, but plays similar to his *Super Street Fighter II Turbo* alter ego. His Flying Barcelona Attack knocks down opponents once again, setting him up for another attempted Flying Barcelona Attack that can be used to cross up the opponent...or a flying Izuna Drop, Vega's most damaging special move. Vega's anti-air crouching Fierce Punch is now ↘ + Hard Punch, and his crouching Strong Punch is now just a crouching Hard Punch. Use Vega's Flip Kick if an opponent is deep, and two-in-one the Rolling Crystal Flash from a crouching Light Kick if you are close enough. Vega may have lost most of his *Alpha 3* priority, but his potential and returned *Super Street Fighter II Turbo* priority may bring him back to the top of the rankings.

Extended Normal Moves

Anti-Air Fierce Claw—↘ + Fierce Punch

Special Moves

Rolling Crystal Flash—Charge ← for two seconds, → + Punch

Sky High Claw—Charge ↓ for two seconds, ↑ + Punch

Flip Kick—Charge ↙ for two seconds, → + Kick

Flying Barcelona Attack—Charge ↓ for two seconds, ↑ + Kick, any Punch button

Izuna Drop—Charge ↓ for two seconds, ↑ + Kick, ↓ + Punch

Backwards Flip—Both Punch or Kick Buttons simultaneously

Super Moves

Red Impact—Charge ← for two seconds, → ← → + Punch

Scarlet Mirage—Charge ← for two seconds, → ← → + Kick

Rolling Izuna Drop— Charge ↙ for two seconds, ↘, ↙, ↗ + Kick, ↓ + Punch

SAGAT RATIO 3

The strongest of the boss characters, Sagat can easily perform his old *Super Street Fighter II*-style fast fireballs with almost no lag...and don't forget his immensely overpowered one-hit Tiger Uppercuts. Sagat's Tiger Genocide Super Move can easily go through most moves, and his standing Hard Punch still has remnants of old-school written all over it. Sagat likes to play keep-away and various mind games. Use his crouching Hard Kick two-in-one into a low Tiger shot to push your opponent away if they try to play too many games of footsie. Mix up your tactics with crouching Light Punch, crouching Light Kick, crouching Light Punch, two-in-one into low Tiger Shot to surprise an opponent as well. It does not connect as a combo attack, but it is a great push-away tactic if an opponent gets a little too close for comfort.

Extended Normal Moves

Roundhouse Sweep—↘ + Hard Kick

Special Moves

Tiger Shot—↓ ↘ → + Punch

Low Tiger Shot—↓ ↘ → + Kick

Tiger Knee—→ ↓ ↘ + Kick

Tiger Uppercut—→ ↓ ↘ + Punch

Super Moves

Tiger Genocide—↓ ↘ → ↓ ↘ → + Punch

Tiger Raid—↓ ↙ ← ↓ ↙ ← + Kick

SAKURA RATIO 1

One of the best Ratio 1 characters in the game, Sakura looks weak at first, but has increased priority on her cross-up combo (which caused nightmares for everyone playing against her in *Street Fighter Alpha 2*) and has easier Super Moves from crouching Light Punches and Light Kicks that will annoy you to oblivion. Factor in Sakura's roll—which has some of the highest priority in the game—and you have an elite character in the making once again. What's that you say? You can't be crossed up because you will just roll out of the way when you see it being attempted? Sakura's jump is much quicker and much harder to calculate if you are on the defensive. Yes, her standing Hard Kick (Roundhouse Kick) has lost some momentum, but her crouching Hard Punch (Fierce Punch) has taken its place as her most effective anti-air move.

Extended Normal Moves

Overhead—→ + Light Kick

Special Moves

Hadoushou—↓ ↘ → + Punch

Shoukakyaku—↓ ↙ ← + Kick

Shinpurenkyaku (after Shoukakyaku)—↓ ↙ ← + Kick, ↓ ↙ ← + Kick,

Kououken—→ ↓ ↘ + Punch

Super Moves

Spring One Round—↓ ↘ → ↓ ↘ → + Punch

Shun Issen—↓ ↙ ← ↓ ↙ ← + Kick

M. BISON RATIO 3

The fearless dictator looks impressive; gone is the "chunky" M. Bison we have grown accustomed to from the *Street Fighter Alpha* series, and back from the guts of *Super Street Fighter II* is a sleeker version of what M. Bison should have looked like all along. Bison's most powerful move is his Head Press, which eats up a large portion of damage—as befits a Ratio 3 character—but is very slow and is telegraphed quite easily anyway. Bison's Somersault Skull Diver is the X Mode *Street Fighter Alpha 3* version. It can still be faked as if you are actually performing that move (or an upcoming Head Press), but you can land next to your opponent and end up throwing them quite easily. Bison's new Psycho Impact can only be two-in-oned into a combo off of a crouching Light Punch or two, and his new Psycho Vanish is worthless. This is what took the place of the Psycho Crusher and projectile that he used to rely on extensively? The Psycho Crusher is now only available as a Super Move; fortunately, each Double Knee Press—when successfully connected—will knock down your opponent, setting them up for another combo attack from crouching Light Punch or Light Kick. Use a standing Hard Punch as an effective anti-air maneuver.

Ridge Racer V

by Ara Shirinian

Ridge Racer V is one of Namco's first PlayStation 2 games. Much like the original *Ridge Racer*, which was also Namco's first PlayStation game, *RRV* development was well underway even before all the hardware specifications and capabilities were known! What you have as a result is a game that hardly pushes the PS2 limits yet still looks better than any other racing game of its time. There are plenty of secrets to find in *RRV*, and we'll blow all the doors open right here!

HOW TO UNLOCK EVERYTHING!

99 TRIAL MODE

99 TRIAL

This endurance challenge appears in your race menu after you've cleared the Battle Royal. You must race 99 laps on Sunny Beach! It's not really hard, but it will take you at least an hour and a half, probably more. Because the distance of the race is so long, the opponent cars will be spaced further apart and they'll be more difficult to overtake. Don't be surprised if it takes you 20 laps just to pass one car! Because of this, drafting is crucial. Get directly behind an opponent when you approach from behind for a small speed boost. Don't forget to get out of the way before you collide, though!

PAC-MAN MODE

PAC-MAN

If you have the patience to accumulate over 1,500 miles on your odometer, Pac-Man will appear in your race menu. 1,500 miles is a long, long distance. The best way to fulfill this requirement is to take the Kamata Angelus out on the Airport Oval in Free Run. With the fastest car on the fastest course, you'll be able to average over 275 miles per hour.

ETERNAL RING

Developed by From Software, *Eternal Ring* can best be described as *King's Field* for the PlayStation 2. The original series had lots of slowdown, dark graphics and a horizon line that was too close, making it difficult or impossible to see faraway objects. Although the engine is similar, *Eternal Ring* never slows down, the graphics are bright and smooth and in some places in the game you can see way off into the distance. It's everything that *King's Field* was supposed to be. One of the gameplay differences between *Eternal Ring* and *King's Field* is that *Eternal Ring* is all about magic and spells (represented as rings in the game). Weapons and other equipment are only marginally important to your success. In this strategy, we'll concentrate on showing you how to obtain all 100 rings!

USING MAGIC

Magic is so important that you should really stock up on MP-healing items when you have the chance. If you can buy about 80 Magic Stones, that will be enough to last you through the whole game. You don't have to buy them all right away, but it's nice to have a stock of about 20 on hand for emergencies. Instead of buying healing items, just create a healing ring like Earth Heal and replenish your MP as necessary.

GENERAL STRATEGY

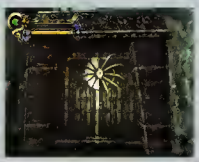
To progress in *Eternal Ring*, there are two important things to keep in mind. First, magic is the key. There are many enemies that will take forever to kill with your sword, but you'll be able to defeat them with only a few hits of the right magic. Second, experience points are crucial. When you enter a new area in the game, you might be overwhelmed by the strength of the new enemies you encounter. Take it easy and defeat weaker ones to build up your strength first. Be patient!

ISLAND MAP

Here is a topological map of all the areas in *Eternal Ring*. It's not to scale and it doesn't show relative positions; it only shows which areas are adjacent to each other and what areas you can travel between via warp points. Remember, you may have to find most of the warp points that are deep within the island before you can use them in both directions. Black lines denote adjacent areas and red lines denote areas connected by warp points.

THE SEALED LABYRINTH

Near the end of the game, there's a secret area where you can battle super-tough enemies and obtain powerful items and rings. Many enemies here are stronger than the last boss! You should be at least above level 40 before you even attempt to enter...and even then it's going to be extremely difficult. There are four floors here and no save points. There are only two exits, one at the beginning and one at the very end of the 4th floor. You can find the labyrinth by walking along the west shoreline at the North Shore of the island, where you begin the game. It looks like you'll drown, but if you walk next to the cliffs you'll have enough room. The entrance is guarded by a door; you'll need a Light or Dark spell (like Divine) to open it.



RINGS

The main focus of the game is centered around creating rings that give you special powers and abilities. All of the weapons in the game are only useful for close, hand-to-hand combat, and most of them are too weak to be effective. For the first part of the game, you'll be heavily dependent on your weapons...but as you progress, you'll have to resort to using magic as your primary attack. The only way to get most magic is to make rings! Once you get the Water Key and reach the save point just before the Worshipping Area, you'll be able to enter the special area called "Forgotten Dais" where you can create new rings. There are three major categories of rings: Magic, Attribution and Extra. Extra rings cannot be created; they must be found in different places throughout the island. To create a Magic ring, you must first find a Ring of Magic. You can then combine gems with the plain Ring of Magic to create a new Magic ring. Creating an Attribution ring is similar to a Magic ring, but you don't need a Ring of Magic.

- Attack Magic Rings
- Assist Magic Rings
- Special Magic Rings
- Single Attribution Rings
- Dual Attribution Rings
- Extra Rings

GEMS

On the island, you'll find all kinds of gems. These are essential for creating rings. Each gem has an element (color) and a level associated with it. The table below shows the correspondence of gem names with their level and element:

Element	Level 1	2	3	4	5
Fire (red)	Glowing	Flame	Lava	Phoenix	Fire Dragon
Earth (yellow or orange)	Leaf	Tree	Forest	Mountain	Earth Dragon
Wind (green)	Feather	Winged	Cloudy	Tornado	Wind Dragon
Water (blue)	Watery	Waterfall	Sea	Iceberg	Water Dragon
Light (white)	—	—	Sunbeam	Divine	Light Dragon
Dark (black or purple)	—	—	Dead	Ritual	Dark Dragon

For the remainder of this strategy, I'll only refer to gems by their level and element, e.g. Level 5 Fire gem.

MAGIC RING CREATION RULES

When you create a magic ring, you must combine up to six gems in different positions with a Ring of Magic. There are a lot of random elements involved when you do this. However, if you use only certain combinations of gems, you'll be able to predictably create any ring you want! Just follow the steps below:

1. Ring Element
All gems on the three spaces on the left side must be of the same element, or color. This determines the element of the ring you want to create.

2. Ring Subtype
There are three subtypes of Magic rings. These rules determine what subtype of ring you'll create:

- If you want to create a Special ring, you must use six of the exact same level 4 or 5 gem.
- If you want to create an Attack ring, all gems on the three spaces on the right side must be either Fire, Wind or Light.
- If you want to create an Assist ring, all gems on the three spaces on the the right side must be either Water, Earth or Dark.

3. Ring Level
Most rings have a "Level" associated with them. As illustrated in the Magic Ring List, each ring can be uniquely identified by a combination of Element, Subtype and Level. The rules below will determine what level your ring will be:

If you're creating a ring of element Fire, Earth, Wind or Water, use this table to determine the level of your ring. The "Gem Total Lv." is the sum of all the levels of the gems you combine.

Gem Total Lv.	Ring level
2-7	1
8-13	2
14-19	3
20-30	4

If you're creating a ring of element Light or Dark, use these tables instead:

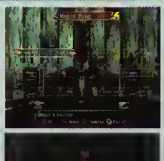
For Light or Dark Attack Rings:

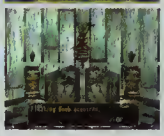
Gem Total Lv.	Ring level
4-13	1
14-19	2
20-29	3

For Light or Dark Assist Rings:

Gem Total Lv.	Ring level
4-19	1
20-30	2

EXAMPLE





To see how all this works, let's suppose we want to create the "Floating Bomb" ring. Looking at the Magic Ring List, we see that this ring has the Fire elemental, it's of the Attack subtype and its level is 3. First, in order to make a Fire ring, all of the gems on the left side must be Fire (red). Next, since we want an Attack ring, we know that all the gems on the right side must be either Fire, Wind or Light. Finally, to create a Level 3 ring, we must make sure that the sum of all the levels of the gems must add up to some number between 14 and 19. One combination that would work is to put two Level 3 Fire gems on the left side and two Level 3 Wind gems plus one Level 2 Wind gem on the right side. If this sounds confusing, with each entry in the Magic Ring List there's an example combination that will result in the ring in its row. These examples use an abbreviated notation:

Abbreviation	Meaning
L( )	Gems in parentheses to be placed on the left side
R( )	Gems in parentheses to be placed on the right side
Fi	Fire gem
Wa	Water gem
Ea	Earth gem
Wi	Wind gem
Li	Light gem
Da	Dark gem
Fi1	Fire gem, level 1
Da4	Dark gem, level 4
etc.	

So, the notation L(Ea3,Ea3,Ea3), R(Ea3,Ea3) means three Level 3 Earth gems on the left, two Level 3 Earth gems on the right.

Eternal Ring

ATTRIBUTION RING CREATION RULES

When you're making an Attribution ring, it doesn't matter where you place each gem. Only the element and level of the gems matter. There are two subtypes of Attribution rings: Single and Dual. If you want to create a Single ring, you must use only gems of the same element. If you mix elements, you'll get random results. Use this table to determine what level your Single Attribution ring will be:

Gem Total Lv.	Ring level
1-8	1
9-14	2
15-30	3

It's harder to create a Dual ring, since the results will always be random; just mix gems of different elements together and hope for the best. When you mix gems of different elements, you'll get a Dual ring only about 25% of the time. However, none of the Dual rings are really worth having, since they only marginally increase your attributes.

Armored Core 2

By Pat Reynolds

Armored Core fanatics have been eagerly awaiting this, the first "true" sequel to the original *Armored Core*, ever since From Software announced its development for PlayStation 2. I am happy to say that—while *Armored Core 2* doesn't stray too far from the path of the earlier AC titles—fans will not be disappointed. This guide concentrates on the different parts in the game, including a complete listing of every single part along with important stats and info about how to find all of the hidden parts in the missions and arena. We'll also uncover the all-important "Human Plus" trick and reveal how it's done. And don't forget to check out the "Hard Core" column on page 122 to see how some of these parts fit together to create awesome Cores.

HEAD UNITS

The computer systems of your Core are stored in its head; these include the various sensors, mapping and radar functions. *AC 2* head units include hacking functions, which allow you to open certain locked doors throughout the game. The head unit also provides a small amount of the total Armor Points.

WEAPON ARM UNITS

Weapon arms are dual weapons that replace standard arm units. These arms cannot equip normal right or left arm weapons, but are typically more powerful than standard weapons.

Note: Only one arm unit, the ZAW-2/SAMURAI, does not allow for Extension parts.

LEGS

Legs determine the overall movement ability of the Core. They also add a considerable amount of Armor Points and help determine how much weight the Core can carry. There are different types of leg units, from average humanoid types to the heavily-armored but slow caterpillar treads. Experiment with different types to find the one that works best for you.

BOOSTERS

Boosters consume energy and allow your Core to zip along the ground and fly into the air for limited distances. The better the booster unit, the longer your Core will be able to maintain its boosted speed and flight.

FCS

These units determine the lock-on ability and range finding of your standard weapons. They are especially useful for missile units, as the better FCS units allow for multiple lock-ons. They also set the targeting window, from Wide & Shallow (a large window but a short range) to Narrow & Deep (a smaller window but with longer range targeting). Note that certain weapons have their own targeting windows regardless of the FCS you choose.

GENERATORS

These units determine the lock-on ability and range finding of your standard weapons. They are especially useful for missile units, as the better FCS units allow for multiple lock-ons. They also set the targeting window, from Wide & Shallow (a large window but a short range) to Narrow & Deep (a smaller window but with longer range targeting). Note that certain weapons have their own targeting windows regardless of the FCS you choose.

BACK RADAR UNITS

As an alternative to a head with a radar function, you can use one of the back positions to mount a radar unit. This reduces the total number of weapons the Core can carry but allows for better radar range with some of the units available.

THE HIDDEN PARTS

Remember that not all of the parts in the game will be available to you at the beginning. Some are automatically unlocked as you progress through the Scenario Mode, while others must be won in the Arena. Some require a certain amount of Corporate Points with specific Corporations to unlock. The most challenging parts to find, though, are the hidden parts scattered throughout the missions. Here's how to find all of them.

Part	Mission Number	Mission Name	How to get it
ZRL-774/WH	N/A	AC Test	Shoot at the small gray circle in the middle of the ceiling until it is destroyed, then boost up into the secret room.
BEX-BB210	12	Escort Train	Wait for the train to arrive and destroy the second-to-last car.
DOX-ALM	13	Safeguard Secret Information	Just before the room with the freight elevator, open the door on the left (you'll need a head unit with a hacking function of more than 4). Destroy the crates in the next room and then blast the panel on the floor to get into the secret area with the part.
EHD-GN-92	14	Ground Based Assault	Follow the bridge to the far end, then head underneath it. You'll find the part on a ledge there.
LS-MOONLIGHT	17	Rescue Research Team	In the area with the floating platforms, look for a floor panel that is colored differently than the rest. Destroy it and drop down into a secret area with the hidden part.
ZBT-GEX-/3000	19	Infiltrate Radar Base	Outside the base are three buildings. Blast open the doors to find the part.
EWM-S612	20	Destroy Radar Base	It's in the exact same location as the hidden part in Mission 19.
KARASAWA-MK2	21	Stop the Surface Weapon	Head forward from the starting location, past the target, and you'll find it on the ground near some rocks.
SP-BLS	24	Destroy Transport Containers	Look for a section of the ravine wall that is colored differently than the rest (past the wreckage of the plane) and shoot it to open up a cavern with the hidden part.
ZES-99/MIRROR	28	Underground Railway	Follow the right branch of the tunnel to the end; you'll find a panel in the wall that you must destroy in order to continue the mission. Search the wall above the panel and you'll find another one in the ceiling. Destroy it and boost up into a secret area with the part.
ZWX-F04/ORBIT	31	Zio City Suppression	Head to the right of the building directly in front of the star locations. Search the streets of the urban area and you'll find it sitting right out in the open.
HOY-BV2500	34	Eliminate Leos Klein	In the area just before the battle with Leos Klein, open the left door (you'll need a head unit with a hacking function of more than 4).

ARENA HIDDEN PARTS

"PLUS" ENHANCEMENTS

Armored Core 2 has the same "Easter egg"—Human Plus enhancements—as the earlier *AC* titles. Start a new game and let your credits fall below -50000; you'll see a cutscene, then restart with one of several enhancements added to your Core. These include the ability to walk while firing heavy back-mounted weapons, the ability to fire a projectile from your Laser Blade, improved radar or boost and reduced energy consumption. (Note: After falling below -50000 credits, you'll restart at the beginning of the game with a zero balance in your account. The fastest way to build up a huge negative credit rating is to take only weapons that fire solid ammunition (bazookas, grenade launchers, rockets), use all of your ammo up, then get your Core destroyed. You'll incur a huge repair and refit bill that will send your funding down to the -50000 mark in just a few missions).

As a member of a ruthless gang of smugglers, it's your job to evade the U.S. Border Patrol, CIA, and cutthroat rivals to deliver illegal cargo. It'll take complete mastery of your off-road vehicle to make it across unforgiving terrain and stay one step ahead of the forces out to destroy you.

DELIVER AT ALL COSTS

SMUGGLER'S RUN

- Levels are over 5 square miles, each with a "drive anywhere" environment filled with other smugglers and law enforcement officials.
- Choose from 35 different vehicles, each with unique modifications and strengths.
- Compete head-to-head or run "pick up and deliver" missions against AI opponents or in full multiplayer mode.
- Maneuver your way through arid desert, icy tundra, or rocky mountain forest.
- Real Time Damage Models allow you to watch the parts fly as you pay the price for punishing collisions!

2. Secure portal

★ In this first level, simply follow Riff around the table to find all of the members of Bravo Team.

★ Once all of your teammates are located, head for the portal. As you approach the portal, be careful of the tan soldiers that appear to block your way. Dispose of all the tan soldiers to finish the level.

★BRIDGE

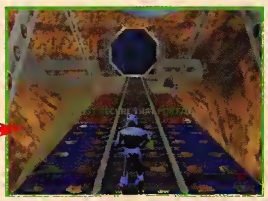
OBJECTIVES
1. Secure the tunnel
2. Secure the portal
3. Keep Vikki alive
4. Escape through the portal

★ On your way down the path, be careful of the soldier with a machine gun waiting to ambush you in a little alcove on the left. Make sure to pick up the grenades behind him.

★ Use the grenades to blow up the fort at the end of the path and collect the tech vest that's hiding inside. Kill all the soldiers in this area to secure the tunnel.

★ Quickly cross the bridge to clear the other side of all the tan soldiers.

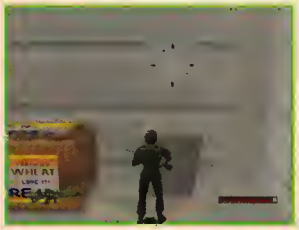
★ Once all the soldiers are cleared, you will be attacked by a helicopter. The helicopter can easily be destroyed with one shot from your bazooka. With the helicopter out of the way, step into the portal.



★FRIDGE

OBJECTIVES
1. Search for Dr. Madd's serum

★ This is a pretty quick level! Make your way to the top of the fridge until you reach the thermostat. When you find the thermostat, climb onto the loaf of bread and jump towards it to end the level.



★FREEZER

OBJECTIVES
1. Discover secret serum
2. Destroy Dr. Madd's secret serum
3. Wipe out all enemies

★ Before you do anything else, grab the high tech armor on top of the ice trays to the right of the starting point. Now that you have the protection of a little extra armor, take out the super robot in the center of the freezer.

★ Dr. Madd's secret serum is hidden inside the soda cans. Destroy all the cans to successfully eliminate Madd's serum.

★ When you destroy the last soda, quickly climb the frozen spaghetti dinners in the middle of the freezer. Face the hole where you entered this level and you will be able to easily pick off all the soldiers as they drop down.

★INSIDE THE WALL

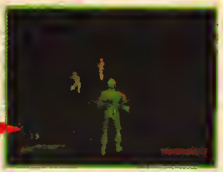
OBJECTIVES
1. Reach the power box to escape

★ This one is short! Follow the pipe into the next room until you see the electrical box. Jump onto the electrical box to make your escape.

★CASTLE

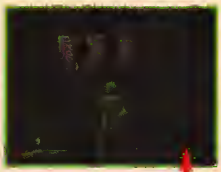
OBJECTIVES
1. Rescue Vikki
2. Secure the serum

★ Make your way to the first gate where you will need a key. As soon as Sarge says that you need a key to pass, turn around and head back down the hall you just came from. You will now have to fight two tan soldiers that where not there a second ago. Defeat these two soldiers to receive the first key.



★ Pass through the first gate; be careful of the tan soldier with the machine gun on the other side. Continue on to the next gate where Sarge will tell you once again that you will need a key. Turn around again to find two tan soldiers guarding another key. Grab the key and pass through this gate to rescue Vikki.

★ Once you rescue Vikki she will lead you to Madd's secret serum. Vikki will take you to the third and final gate. The tan soldier down the hall on the left guards the key for this gate.



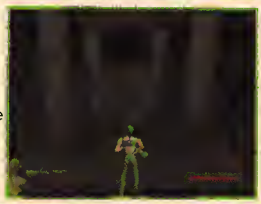
★ Past this gate you will find the secret serum. Do not get too comfortable because you are about to be ambushed by an army of tan soldiers. Turn around and kill all of the tan soldiers that come rushing in to finish off this area.

★GRAVEYARD

OBJECTIVES
1. Reach Dr. Madd's Castle

★ When you reach the top of the ramp, make your way to the left in the graveyard to find Hoover. After a brief conversation, Hoover will lead the way to the castle key. Stay as close to Hoover as you can! If you stray too far from his path, you will probably step on a mine and the game is over!

★ Instead of trying to find your way back through the minefield, jump down from where you just grabbed the key and make your way to the giant black gate leading to the castle.



★TAN BASE

OBJECTIVES
1. Capture Tannenberg
2. Keep Thick alive

★ This is your basic run-and-shoot-everything-in-sight level! Try to stay ahead of Thick and kill all of the tan soldiers that appear. Thick will hide in one of the destroyed bunkers, letting you concentrate on Tannenberg.

★ Continue on through the streets until you reach a tan helicopter about to take off. Do not go rushing into this area; the helicopter is about to explode, which will inflict a lot of damage if you get too close. Once the helicopter explodes, you will find Tannenberg waiting to surrender in the corner.

★REVENGE

OBJECTIVES
1. Get Grimm to the helipad

★ Don't worry about killing every single soldier in this stage. Stay close to Grimm because he will lead you straight to the helipad.

★ Grimm will lead you to a giant locked door and tell you to cover him. You will have to keep Grimm alive for 60 seconds at all costs, or the game is over. Once Grimm opens the door, it's smooth sailing to the end of this level.

★DESK

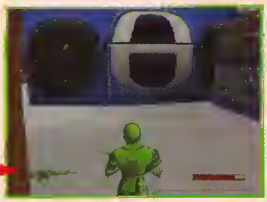
OBJECTIVES
1. Recon the bedroom
2. Locate Tan HQ
3. Meet Scorch at the Rendezvous
4. Keep Scorch alive

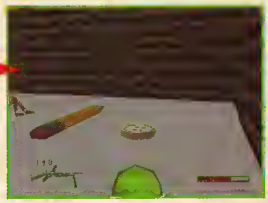
★ Work your way down the bookshelves until you reach two giant books blocking your path. Sarge will tell you that you need to make some noise!

★ Directly behind you is a giant radio that will help you to fulfill this order. Climb on top of the giant radio to turn it on.

★ As you continue on, make sure you step on the buttons on the floor to open the next two doors leading to the rendezvous point.

★ Once you reach the rendezvous point, you will find Scorch melting all the tan soldiers. Kill any of the soldiers that Scorch missed to clear this level.





★BED

OBJECTIVES
1. Find Brigitte Bleu
2. Secure the landing zone
3. Capture Brigitte Bleu
4. Keep Thick alive

★ As soon as this level starts, help Thick destroy the two tan helicopters and all the surrounding soldiers. The easiest way to keep Thick alive is to stay ahead of him and kill every tan soldier that you see.

★ Keep on moving until you reach the area where Brigitte and her blue tank are waiting to ambush you. Two shots from your bazooka and this stage is over!

★TOWN

OBJECTIVES
1. Save Brigitte's town
2. Keep Riff alive
3. Keep Brigitte alive

Using your radar is a must for this level because the enemy comes at you from all angles (press L to turn it on). Kill all the tan soldiers as fast as you can because Riff dies pretty quickly.

★ Follow Riff to the center of town where two giant robots are waiting for you. Use your bazooka from a distance to destroy them.

★ Once the robots are destroyed, meet with Brigitte and Riff in the corner of town to exit this level.

★CASHIER

OBJECTIVES
1. Secure gumball machine
2. Free Vikki from the gumball machine

★ Go right from your starting point and head toward the giant cash register. Climb on top of the register and Sarge will tell you that the ATM machine will open the drawer.

★ Jump off the register and take the path to the right of the giant radio. This will lead you to the ATM machine. Jump onto the ATM machine to open the cash register's drawer. Head back to the register and collect the coin from the now-open drawer.

★ With the giant coin in your little pocket, secure the area around the gumball machine by destroying all the robots. With the area secured, you can release Vikki from the gumball machine.

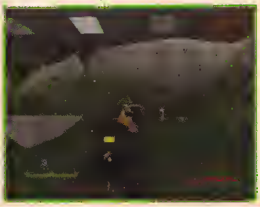
★TRAIN

OBJECTIVES
1. Destroy all trains
2. Escort Vikki to portal

★ Do not worry about destroying the trains in the starting area. Quickly circle this area and pick up all the bazookas. Then go straight from the starting point into the next section where the portal is located.

★ Clear the area of the tan army and prepare to sit! Plant yourself in front of the portal and wait for each train to come to you. When a train appears from the tunnel, you will have a clear shot with your bazooka. Blow up all the trains and make your escape.



★POOL

OBJECTIVES
1. Deactivate two tesla coils
2. Rescue Brigitte Bleu
3. Keep Brigitte alive

★ The first generator is located in the far right corner from your starting position. Kill as many tan soldiers from a distance to make reaching this generator easy.

★ Once the generator has been destroyed, jump down into the hole behind the two poles where the electricity was.

★ Follow the tunnel to the left until you reach a stack of blue pool chalk with a hole above it. Climb up through this hole and get ready to take on a tan tank. A couple of shots from a bazooka will easily clear the way for you.

★ When the area is cleared, head through the break in the wall where you came in from.

★ Locate the corner pocket and jump down to find the second generator to the right.

★ When you have successfully destroyed this generator, head back to the pair of electrified poles that you passed on your way here.

★ Drop into the side pocket and follow the tunnel until you arrive at another pile of blue chalk. Use the chalk to climb out of the hole; you'll find more blocks for you to climb. Climb these blocks to find Brigitte waiting for you at the top.

★ROCKETS

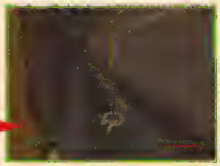
OBJECTIVES
1. Destroy all rockets

★ This is a timed stage where you play as Vikki, racing the clock to blow up a few rockets. From your starting point, hang a left to find the door to Silo 1. Use a grenade or dynamite to destroy the door. You can quickly clear out this area by shooting the red barrels just beyond the door. Once the area is clear of tan soldiers, blow up the missile with a little dynamite.

★ Now head right past the starting point to find Silo 2. Just like before, blow up the door to enter. Before entering the area, shoot the red barrels to make it a little easier. Enter the area and blow up the second missile.

★ Exit this area and head straight to the opposite side before hanging a left. Find the door on the right without any numbers on it. Fight the urge to enter Silo S on the left because you will run out of time! Destroy the unnumbered door and turn left to find Silo 3.

★ Once the third missile is destroyed, you will find the door to Silo 4 on the opposite side from where you entered. Blow up the door and missile number 4 will be right there for you to destroy.



★ Head back to Silo S to take care of the last missile and save the day.

★PINBALL

OBJECTIVES
1. Save Bravo company commandos
2. Capture Plastro

★ This is it, the final level! This one involves a lot of running back and forth. The first commando you will need to rescue is Scorch, who is located straight ahead and to the left from the starting position. Follow the team of tan soldiers to help you locate him. Follow Scorch to the exit to be sure that he escapes unharmed.

★ Back at the starting position, you will see three tan soldiers heading toward the left flipper. Follow them to find Thick hiding in the corner. Escort Thick to the exit and follow him through it.

★ You will land in the pinball lane ahead of three tan soldiers who are coming for Sharp. Kill the soldiers and lead Sharp to the exit.

★ Located straight ahead from the exit are three large yellow drop targets. The target to the left is now lowered, leading the way to Hoover. Kill the three tan soldiers who are about to attack Hoover and lead him to safety.

★ Once Hoover escapes, the right target will drop leading to Riff, the final commando.

★ When Riff is in the clear, the center target will drop. This is the way to the final battle. Head down this lane to find Plastro! Defeat all of Plastro's men to secure the area and capture Plastro himself. Congratulations...you have just saved the world of green!

TONY HAWK'S PRO SKATER 2

by Pat Reynolds

Tony Hawk is at the top of his game this year, with another X-Games win (Vert Doubles event with partner Andy Macdonald and some truly amazing tricks) and a new book called *Tony Hawk: Occupation Skateboarder.* Oh yeah...and the sequel to the best skating game ever made is hitting multiple systems this fall! The original *Tony Hawk's Pro Skater* was not only a great skating game, but also one of the best PlayStation titles to date. *Pro Skater 2* carries on that tradition, retaining everything you loved about the original and adding much more. This strategy will help you get all of the level goals, plus offer trick suggestions and favorite trick combos for each level.

THE BASICS

Career Mode is broken into eight stages, each with ten goals to achieve. You earn cash for each goal you make, and you need a certain amount of cash to open the next stage. There are also three competition stages, in which you'll get three 1:00 runs to score as many points as possible and win a medal. You'll need only score any medal on these stages to open the next area. This guide will show you all of the goals on each of the non-competition stages and also offer tips on scoring high in the competitions. First, here's a quick look at some of the new stuff and some important trick tips.

SPIN CITY

As in the first *Tony Hawk* game, scores are based on multipliers and the number of tricks you can execute before landing with all four wheels on the ground. An excellent source of additional points is the spin. Tap R2 or L2 during tricks to make your character spin 180° for each press of the button. Because the spin happens simultaneously with the trick, it doesn't take any longer to pull off, and you'll score more points (just be sure to have a lot of air if you're going for anything more than a 360°). For an example, try riding along the ground and pulling a 8oneless (↑↑ Jump) into a Kickflip. It's worth about 840 points. Throw in a 180° while you do the Kickflip and you've got 1260 points for very little extra effort. You can tack at least a 180° spin onto practically any trick, and big air tricks give you enough time to spin 360°, 540°, or 720°. Try to find the biggest jump possible and go for the 900!

THE MANUAL

Neversoft has added a new type of trick to this game; it's called a manual. Simply put, a manual involves riding on either the two front or the two back wheels of the board. (Think "wheelie.") There are two types of basic manual, plus a handful of special manuals. Nose manuals are done by tapping ↓↑ before hitting the ground after a jump or a trick, while tail manuals require tapping ↑↓. Manuals open up a whole new world of trick possibilities, because they keep a combo going after you've hit the ground, which would normally end your combo. When a manual is started, you'll see a balance meter and your character will begin to slow down. You can't hold a manual for very long, so they are best used to link together two nearby obstacles or for landing from a big jump trick and riding over to a rail or ramp.

SWITCH STANCE

Another new addition in *Tony Hawk 2* is the ability to ride switch stance (tail forward) at will, changing between normal and switch with the press of a button. You'll get different trick variations when riding switch stance than normal. You'll also be able to jump Fakie or Nollie depending on which way you're riding. Experiment with the different jumps and tricks in both stances and try to find the best scoring tricks for each one.

HUGE GRINDS

Never grind a long rail from start to finish with just one trick. The longer the rail, edge or lip, the more tricks you can pull in one run. Try starting a grind, then jumping into a kick trick with a spin, landing back on the rail with a different grind, then repeating that three or four times with a final jump into a trick off the rail. You'll see huge scores pop up after landing a giant string of grind tricks because of the multipliers you're getting for all of the tricks and spins you throw into the combo.

THE HANGAR, MULLET FALLS, MONTANA

Score Tips & Favorite Line

This is a great level for building insane combos; you shouldn't have a problem getting all three of the score goals here. Pulling tricks while jumping over the half-pipe is a good way to get big combo points, as are multiple grinds along the lip of the pipe that runs the length of the hangar wall. Try this trick combo that combines both of those elements: From the starting ramp, head straight, then pull a Boneless jump at the lip of the half-pipe. Break into a couple of quick kick tricks with a 360° spin thrown in as you fly over the pipe. Before you hit the ground, tap ↑↓ or ↓↑ to land into a Manual. Ride the Manual up the ramp along the wall, angling to the left. Ollie into a grind on the lip of the ramp, then pull two or three 180° jumps into different types of grinds, for as long as you think you can hold the balance. I've bagged over 50,000 points for this one combo alone! Getting the Sick Score of 75,000 is as easy as pulling a couple of these combos (with different tricks for maximum scores).

Nosegrind over the Pipe & Collect S-K-A-T-E

Okay, nailing the nosegrind over the pipe is super easy—you're lined up with it from the start. Just be sure that when you hit the rail you're holding Up on the controller along with the Grind button to get the nosegrind. You'll also nab the "S" from the Collect S-K-A-T-E goal and be lined up for the "K".

Jump off the quarter-pipe to grab the "K", then head toward the plane, where you'll be able to jump off the wing and secure the "A."

Once past the plane, use the quarter-pipe to jump through the window to the right and snag the "T" on your way down into the second room of the hangar. Pop up the ramp on the left wall to grab the "E."

Barrel Hunt

This is another easy goal. The first three barrels are in the main room—one's in the half-pipe and the other two are on the ground (one on the other side of the pipe and one near the plane). Smash through the glass into the helicopter room and you'll find another barrel on the ground near the copter; the final one is on top of the ramp in front of the door to the secret area.

Tony Hawk's Pro Skater 2

Collect 5 Pilot Wings

This is another easy one. These are all out in the open, and none of them are in the secret areas. There are two above pipes, one on the propeller in the half-pipe, one on a rail near the plane and the hardest one to get is above the starting ramp. You need to hit the quarter-pipe on either side of the ramp with enough speed to jump across to the other side and nab the Pilot Wing en route.

Hit 3 Hangtime Gaps

The three Hangtime Gaps are as follows: jumping completely over the half-pipe, jumping over the plane using its wing as a ramp and jumping over the parked helicopter.

Find the Secret Tape

Hit the ramp in front of the helicopter and grind along one of its blades. This causes the chopper to take off, opening the door to a new area. Transfer from the ramp along the wall into the new area and hit the quarter-pipe to grab the Secret Tape.

100% Cash Tips

Most of the cash in this level is out in the open and easy to get, but there are a few bills that require some tricky maneuvers to grab.

There is a second hidden area in the level; this one is opened by grinding the propeller blades that hang on the wall to the right of the half-pipe. This opens the way into a huge half-pipe area with a giant fan at the far end. This is a cash-rich area, with three $50s and a $100 waiting to be grabbed out of the air above the pipe.

Build up speed and jump the half-pipe from the starting ramp, then jump up the wall pipe to grind the high rail attached to the far wall. Ride the rail to the left and jump off at the very end to get the bill.

This last $100 is the hardest bill to get in the level. You'll need to pop up off of the fuselage of the plane using the wing as a ramp, and then grind the light fixture above it to the right (toward the half-pipe) until you get to the cash. The jump to the fixture in the toughest part, since it's hard to get enough height and easy to simply fly over the plane to land on the other side.

School II, Southern California

Score Tips & Favorite Line

This is a street skater's dream course. There are rails, benches, planters and edges to grind everywhere, with no half-pipes or pools to be found for the vertically inclined. With that in mind, there are some excellent grind lines. Use the tips for big grind tricks detailed earlier on any of the long rails and planters in the level. Try this one out: Line up with the bike rack facing toward the staircase at the far end. Pull a Boneless jump into a 180° kick trick into a grind, then pull another 180° jump into a different grind onto the second rack. Jump before the end of the rack, pull a final quick trick with a spin and land into a Manual, riding toward the staircase. Jump out of the Manual into a grind going up the rail (you'll be able to ride it all the way because of the speed you gained on the bike racks). Finally, jump from the rail at the top with another spin trick to end the run. This line can get you over 30,000 points easily. For an even higher score, have your special meter filled before starting the trick and pull a special grind up the final rail (or a special manual to the rail, or both).

Collect S-K-A-T-E

From the start, take the sharp right turn down the hallway and grind the rail for the "S". This brings you into the courtyard, where you'll find the "K" waiting for you above a quarter-pipe up on the platform.

Next, head out through the hallway in the far wall and grind the long staircase rail for the "A". Veer right at the bottom and you'll see the "T" waiting for you above a quarter pipe along the far wall.

Finally, head past the trailers to find the "E" above another ramp.

Wallride 5 Bells

Wallriding successfully may take a bit of practice, but at least the Bells are easy to find. Remember to angle toward the wall at about 45° before jumping into the wallride. The first Bell is just past the start point to the right. Head straight and hug the right walls to find the second Bell. Now go left and you'll find the third in the far corner of the stage. The fourth is on the left wall at the top of the bike rack incline. Go past the bike racks and up the ramp into the area with the Secret Tape (it's hanging in midair well out of reach) and you'll see the final Bell in the far corner.

Collect 5 Hall Passes

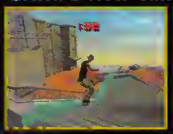
The Hall Passes are also easy targets. From the start, veer right and take the hallway that runs parallel to the big staircase to grab the first Pass. Head straight on and you'll see the second Pass near the picnic tables. The easiest way to grab this one is to skate past it and turn around, using the incline as a ramp to jump up and nab the Pass. Continue on and you'll see the third Pass in the air near the main school entrance. Grind the first rail and catch the Hall Pass as you jump to the second rail. Immediately turn left around the corner and catch some air off the quarter-pipe to reach the fourth Pass. Finally, head to the right and you'll see the fifth Hall Pass atop a raised planter.

Kickflip TC's Roof Gap

TC's Roof Gap is between these two outdoor trailer classrooms. There are kicker ramps on both sides, so use one to pop up onto the roof (it's not a hard jump at all) and then be sure to pull a Kickflip as you jump between the trailer roofs. Oh, yeah...landing upright is important, too.

Tony Hawk's Pro Skater 2

Grind 3 Roll Call Rails



The three long rails in the level are the "Roll Call Rails;" you'll need to grind them for almost their entire lengths to get the goal. The first one is straight ahead from the start point. Hit it as close to the top as you can and ride it to the bottom. Angle left and follow the pavement around the trailers to find the second rail. You'll need to ollie over two sets of steps to get to the top. Turn around and ride the rail back to the ground. Head to the right, up the incline with the bike racks and to the right. The final rail sits in the middle of a half stairs/half-ramp incline. Take the ramp to the top, then ride the rail back down.

Find the Secret Tape

The Secret Tape on this level requires a lot more skill to reach than the one in the hangar. From the start, hit the hallway immediately to the right of the first bell. Follow it into the open courtyard and turn left at the far corner. You're in position for a run at the planter ramp that you need to hit in order to reach the awning. The best way to do this is to approach it at an angle (as shown in the first picture) and wallride the wall to gain height. Jump off the wall onto the awning. The next step is the trickiest. Follow the awning toward the far wall, which it intersects at a 90° angle. You need to wallride the wall to the left and jump off at the height of the ride to catch the edge of the low rooftop. Be sure to pull a Boneless jump from the awning and wait until the peak of the wallride to jump off, holding the Grind button down after you jump so you don't miss the edge. It'll take a few tries, but you'll get up there eventually. You'll see two ramps, but don't bother with those yet. Instead, head straight between them and jump off the roof toward the Secret Tape—it's plainly visible.

100% Cash Tips

This level really puts your wallriding skills to the test. Between the Secret Tape, the hidden area, riding the Bells and getting all the cash, you'll have to ride almost every wall in the level! This bill is off a ramp to the left of the start point. Ride the wall just before the railing, jumping off to the left so you land on the overhang, then jump off the ramp to grab the bill.

Here's a run that'll net you three bills, but requires some serious skill to pull off. At the start, wallride up over the Bell to the right and jump at the height of the ride. Hold the Grind button and you'll catch the ledge above you if you got enough height. Ride the edge until you get the $50, then jump to the right and you'll be in a school hallway. Jump through the window at the end of the hall onto the opposite rooftop. You'll see a small building ahead with a ramp in front of it. There's a rail leading from the building to the opposite roof that you need to ride, but you can't see it! You need to aim for the middle of the small building, hit the ramp and pray that you're lined up with the rail. There's another bill on the rail...and after you jump across to yet another rooftop, you'll see a third bill hanging in the air to the left. You need to build up speed and throw yourself at it from the left rooftop corner.

In the courtyard where you wallride to the awning, look for this low1 wall just as you enter. Wallride it and jump to the awning (this is the awning opposite the one you used to get the Secret Tape). There's a $100 bill up top waiting for you.

The rest of the "hard money" in the level requires you to get back up on the rooftop from which you grabbed the Secret Tape. Use the same technique to get back up there, then turn around and look back toward the open courtyard. You'll see this $50 hanging just off the edge; you need to jump from the roof to get it.

There's a hidden area across the gap where you grabbed the Secret Tape. Hit one of the ramps, angling toward either of the flagpoles and grind over to the far rooftop. From there you can drop down into a new area, with an easy $50 and $100 waiting for you. To get back to the main area, use a ramp to jump over the gray stone wall.

MARSEILLE, FRANCE

The first competition stage offers up plenty of opportunities for both vert and street skaters. Vert skaters can catch some big air from the bowls and ramps that comprise a large portion of the area, while street skaters will find loads of rails and one especially long planter rail that runs parallel with a metal rail. This is a great opportunity for huge grind chains; you can hop back and forth between the two rails while pulling tricks. Jump into a Manual and either continue the grind action on the picnic table or the curved rail nearby, or jump into the bowl and pull a 360° trick on the way down. There's one tough $100 in the level; it's above the banner right in the middle of the stage. You'll need to get some mighty air off one of the bumps down below to reach it. Ascore of 20,000 will usually earn you a medal, while 30,000 or better will give you a good shot at the gold.

NY CITY, NEW YORK

Score Tips & Favorite Line

The Subway rails are far and away the best scoring obstacles in this stage. By jumping between them and using a variety of grinds, you can pull off 70,000+ combos fairly easily. Each time you successfully jump from rail to rail you'll earn a gap bonus on top of whatever tricks you pull off. You'll want to have your rail balance stat maxed out to take full advantage of this, though. My personal best combo on the Subway Rails was 96,000 points! It was no problem to tack on the extra 56,000 by heading back and hitting the rails a second time to make the 5ick Score of 150,000 with just two combos!

Collect S-K-A-T-E

The "S" is up on the wall to the left of your start position. Turn left at the corner and you'll see the "K". Jump over the wall and then use the ramp below to get enough air to grab the letter.

You're in position to quickly grab the last three letters now. The "A" is in the plaza with you; make a run at it and use the small bump leading up to the statue as a ramp to get the height necessary to reach it. Leave plaza through the arch and you'll see the "T" waiting for you near the rail; the "E" is just beyond it above a conveniently-placed quarter-pipe.

Ollie the Hydrants

There are three hydrants, and they're all near the streets. From the start, turn around and follow the road to the dead end to find the first hydrant. Return to the start point and continue up the road. At the "T" junction, you'll find the other hydrants by following the crossroad to each end.

Collect 5 Subway Tokens

This is another easy goal as long as you take them in the right order. From the start, ride straight and turn left at the corner. Jump the ramp along the right wall for the first Token, then jump off the ramp directly opposite—angling slightly to the left—to grab the second Token. Immediately turn around and grind the rail off to the left (heading back toward the street) for the third. Now turn around again and hit the rail on the bridge to the left for the fourth Token. Continue on into the park area. You'll see the final Token suspended in the air near a large rock. You need to jump from the rock to get this Token. Collecting all of the Subway Tokens opens the Subway ramp, which is normally blocked with a chained gate.

Joey's Sculpture

You might think that Joey's Sculpture is the neoclassical piece in the plaza where you found the "A" in SKATE, and that'd make sense, but you'd be wrong. Joey's Sculpture is this sharp-edged triangle that juts upward from the small storefront-ringed courtyard below. In order to 50-50 grind the sculpture, you should approach it head-on and ollie over the rail, then simply hold the Grind button as you hit the top of the sculpture.

Grind the Subway Rails

The Subway entrance is just ahead and to the right of the start point. Ride up the escalator and you'll find the platform above with the rails leading out over the streets below. Get some speed on the platform and jump to the rails. Switch between rails by jumping left and right and continue the grind as the tracks lead toward the tunnel. You'll need to grind almost the entire distance to the tunnel to get the goal. Be sure to jump between rails as you ride for a good score as well. At the bottom, jump off the rails to the right and you'll find yourself in a hidden area. Note: You can also access this hidden area via the metal pole that's propped up against the outer wall along the road.

Find the Secret Tape

You'll need to head to the hidden area you found by riding the Subway Rail in order to get the Secret Tape. Look for the expressway ramp and start riding it as it slopes upwards. It's unfinished; you'll see some metal rods sticking out at the end. Grind the rod on the far right and you'll see a concrete support up ahead...and just beyond it, the Secret Tape! This part is tricky, though. You'll need to transition to the metal rod on the far left that starts just before the support. You can jump to the support and then—very quickly—jump to the rod and grind it. Finally, jump off of the rod at the end to grab the Tape.

VENICE BEACH, CALIFORNIA

Score Tips & Favorite Line

This level is all about the miles of low walls, fences and other edges. There are great monster grind combo possibilities everywhere, but my favorite is the one right near the start, where you can grind from fence to wall to fence, back to another wall and then manual over to the quarter-pipe and pull a handplant or trick. This is usually good for 30,000 to 40,000 points, which is useful if you want to nail the first score goal in a single trick and have loads of time left to build it into a Pro Score or Sick Score.

Collect S-K-A-T-E

All of the letters are on the rooftops, and there's a way to grab them all without ever leaving the roofs in under a minute.

Turn right from the start point and angle toward the left fence. Jump up on the fence and grind it as you approach the rooftop. Jump from the fence to the roof and hit the "S". Immediately turn left and follow the roof until you see the "K" hanging in the gap between two roofs. Pop over to the next roof, grabbing the "K" on the way and stay near the left edge of the roof. You'll see a narrow wall jutting out from the end of the roof. Grind it and jump at the end across to the next rooftop.

The "A" is waiting for you near the skylight. Next, hit the ramp at the far end to clear the gap up to the next rooftop. The "T" is above an odd-shaped ramp in the far corner. Finally, drop down to the lower roof (with the ropes) and you'll find the "E" above a ramp that runs along the far edge of the roof.

Ollie the Magic Bum 5x

The Magic Bum "teleports" to a different location each time you ollie over him. So, unlike the other collection goals, you must complete this one in a set order.

You'll first encounter the Bum by skating straight from the start and heading through the opening near the middle of the far wall.

Next, return to the main courtyard and head to the right, into the opening in the far corner. Ride down the ramp and you'll find the Bum near the wall by the quarter-pipe. (Note: This is the same area you'll use to reach the Venice Ledge later on.)

The third appearance of the Bum is back near the start point. Head back there and turn left just past the fence to find him a bit farther down near the wall, still sleeping soundly.

Continue on in the same direction and turn left at the far end. Look for the Bum in a niche along the left wall, just past the quarter-pipes.

Finally, return to the start point and you'll find the old codger directly behind where you begin the stage.

Collect 5 Spray Cans

At the start, rotate left and you'll see the first Can in the air above the low quarter-pipe. Grab it, then head along the beachfront wall to the right of the start point.

At the far end you'll see the second Spray Can. Hit the quarter-pipe to grab it, then turn right and follow the path to the far end, where you'll see the third Can hanging in the air in the gap between two quarter-pipes. Hit either one, angling toward the Can and you'll be able to pluck it out of the air as you complete the transfer.

Now return to the central area with the tables. The fourth Can is on a rail near the starting point, while the final can is above another quarter-pipe, this time in the area where the Magic Bum appeared for the second time.

Tailside the Venice Ledge

There are a lot of ledges in this level...which one is the Venice Ledge? It's kind of tricky to find, but once you know where it is, it's not hard to reach. Head into the main area (with all of the tables) and enter the opening in the far left corner. Ride down the stairs, then jump over the wall behind the quarter-pipe. The Venice Ledge is on the other side (look for the low wall with red graffiti). Start your run from the very back of the ledge.

Hit 4 VB Transfers

Two of the four VB transfers can be achieved from these quarter-pipes near the first Magic Bum site. You'll need to transfer across the wall to the pipes on the other side. The "VB Skinny Transfer" is over the shorter section of wall, while the "VB Fatty Transfer" is harder, forcing you to clear a big section of wall.

This secluded half-pipe, found along the wall of the central area, can be used to hit the "VB Pit Transfer" by angling hard to the left as you jump from it.

Find the Secret Tape

The last VB Transfer links the two quarter-pipes on either side of the Venice Ledge. Note—any of these VB Transfers can be done from either of the two quarter-pipes that link each transfer together.

The Secret Tape isn't hard to spot at all—it's high above the central area, balanced precariously on a wire running between two poles. It seems like the way to get it is from the nearby rooftop; there's even a ramp placed on the roof's edge that'll help you jump in the direction of the tape. In fact, you are able to grab the Secret Tape from the roof if you can build up enough speed to bridge the distance from the ramp to the tape, but there's an easier way to get it done. First, build up speed by pulling a trick on this quarter-pipe along the wall, and then hit the table in the picture (it's the one below the Secret Tape, connected to other tables by railings) and pop up with a No Comply or a Boneless jump. If you're going fast enough, and execute the jump at the right time, you'll get enough air to boost almost straight up and grab the Secret Tape. You'll want to hold the Grind button down as you fly upward—if you miss the Tape with your jump there's still the possibility of grinding the cable and getting it that way.

100% Cash Tips

There's really only one tough piece of cash to get in this level, but there's another that might not be obvious. In the central area, there's a $250 bill above one of the big sculptures. You have to get up on the roof and use the ramp to launch yourself over the statue. Be sure to have a lot of speed when you hit the ramp or you'll fall short. The other bill—also $100—is on a banner hung across two rooftops. You might think that you need to jump for it, but you can actually grind the rope that the banner is hanging from (that's some seriously strong rope!) to make getting the cash easier. Look for the rest of the moolah in the level on top of fences and in big air gaps as well as lying out in the open.

SKATE STREET, VENTURA

Skate Street is the second of three competition stages in the game, and in my opinion it's the easiest of the them. With maxxed out Air, Ollie and Spin stats, you'll be able to session the large pool alone and take home gold after three heats. Likewise, if you boost your stats for rail balance, you can break out some monster grind combos on the miles of railings and edges here. Because each heat only gives you a minute to score big, I'd suggest finding one or two areas and sticking to them. As I mentioned, the pool is very reliable and safe, but there are also a couple of big half-pipes...and the snack bar area above the main floor has many rails for maximum grind combos.

Score Tips & Favorite Line

This stage is pretty heavily skewed toward street skating, with lots of rails, edges and low walls to practice your mega-grind combos. The hidden skate park does make up for this, with plenty of opportunity for big air tricks as well. My favorite line in this level is the high rail that runs along the street and around the corner. The opportunity for huge points on this obstacle is very good; you'll want to wallride just before the rail and jump onto it at the start, then start with the jump-trick spin-grind repeat combination machine until you near the end of the rail. Jump off, pull another trick into a manual and then ollie into another wallride, jump and pull off a final trick. If you're really daring, you can even repeat the manual-wallride-jump-trick a few times for an even higher score. Even mediocre combos on this rail can score 30,000+ points!

Collect S-K-A-T-E

Skate straight and hop up onto the grass. Keep riding forward and you'll see the "S" at the far end—jump and grab it.

The "K" and the "A" are close together. Jump onto the blue awning to get the "K", then drop down and pick up the "A" from the nearby curb.

The last two letters are also lined up nicely. Ride up the rail to the balcony just past the "A" and jump off for the "T". You'll see the "E" up ahead when you land; get up on the high ground and make a jump at the edge to snag it.

Drain the Fountain

You need to get to the balcony on this building in order to drain the fountain. The only way I was able to do this was by wall-riding and jumping at the peak of the ride to catch the railing with a grind and then hopping onto the balcony. (Note: You can also get the Secret Tape from this building if you wallride and jump up onto the high roof, then ride the cable as it slopes downward toward the fountain).

Collect 5 Bells

From the start, turn right and you'll spot the first Bell in the gap between the two ramps. Fire it up and pop off the first ramp to pick it up.

The next Bell looks like it's up on the awning from a distance, but it's not. It's actually in the air between the two concrete ramps near the awning. The last two Bells are lined up nicely. Near the awning you'll find Bell number four waiting for you to wallride it near some stairs. The fifth Bell is past the stairs, sitting on a low wall.

Bluntside the Awning

The last two letters are also lined up nicely. Ride up the rail to the balcony just past the "A" and jump off for the "T". You'll see the "E" up ahead when you land; get up on the high ground and make a jump at the edge to snag it.

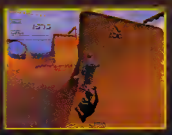
Liptrick 4 Skatepark Lips

The skatepark is blocked off by a fence when you play this stage. In order to access the park, you need to knock a pole onto the fence. To do this, head toward the awning and take a left. Ride up the ramp (with the blue railings) and look for the cable running upwards from the far corner. You have to grind this a pretty good distance (a little better than halfway to the pole usually does it) for the pole to fall. Now the fence is gone and you're right in front of the skatepark! Start busting your repertoire of liptricks (handplants and boardplants) on the lips of the quarter-pipes and half-pipes scattered around the park. Note: Once you open the skatepark, it stays open for successive runs through the level.

Find the Secret Tape

Line up as shown in the first photo, facing the cable that runs over the fountain. Build up some speed, then jump and grind the cable. Keep jumping and pulling tricks and different grinds and you'll actually build speed going up the cable until you reach the Secret Tape!

THE BULLRING, MEXICO



The final competition stage is also the toughest. The Bullring is set up around a giant half-pipe with a loop built into one end. This is the best area to score big points, as the rest of the area consists of assorted ramps and rails, with the only other really promising trick area being the edge of the low wall the encircles most of the ring. Of course, if you've mastered the Manual, you can link together several of these obstacles into big combos. Just be careful of the bull running around the periphery; even if you're on the wall it'll knock you off and end your combo the hard way. The loop itself is hard to work into a combo, but it gives you a nice 6,000-point score for simply riding through it the first time, so you'll probably want to work it into your run at least once.

GAMEPLAY TIPS

Using the horn is only good for stunning your opponent. This takes awhile to actually give you a "kill" in multiplayer mode.

Try to always keep your trackball set with the red blip on the radar at the top. This way you will always be ready to have a direct hit placed on your opponent, even from a great distance.

Grab all the money you can; you will need it to be able to unlock many of the hidden characters. Using the random-select feature to choose a character at the start will also increase the monetary values throughout the course of the game.

Many stages have levels that will require you to either jump up to a higher point, or to walk to a lower position. Be aware of the surrounding area before making any hasty decisions.

Health appears after you have knocked your opponent into oblivion. Grabbing a health box will increase your life meter, changing half of it to the color green, which represents one and a half times the power of the regular life bar.

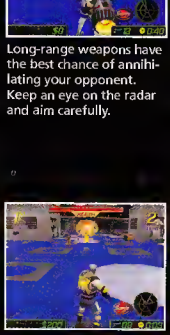
Long-range weapons have the best chance of annihilating your opponent. Keep an eye on the radar and aim carefully.

Don't listen to the announcer. Shooting the audience members will earn you "the bomb." Knocking your opponent out with "the bomb" earns you two kills.

Use the trigger button to carefully jump over various weapons and incoming Super Moves. Each opponent can only use a Super Move once before making a "kill." Keep track of whether or not your opponent has used it, or is setting you up for a big fall.

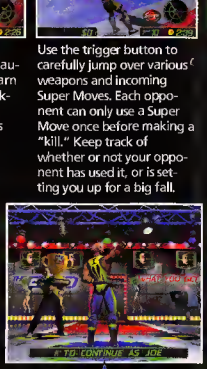
It is difficult to reach opponents who are perched at higher locations. Try to shoot your opponent at level ground. If you attempt to knock them off their pedestal and miss, they will have a great opportunity to shoot you down from a standing position.

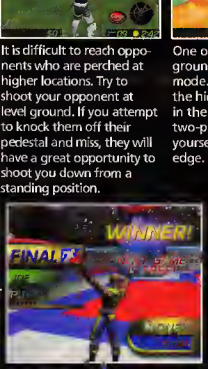
One of the hidden backgrounds in multiplayer mode. Get accustomed to the hidden areas located in the game by a playing a two-player game against yourself first to gain an edge.



Out of weapons? Run up to your opponent from behind and slam 'em!

Also: Nothing beats being able to effectively shoot from corners, turning and using your trackball to obliterate your opponent, hiding again and repeating! Use these tips wisely and you could be the king of *The Grid* at your local arcade!





Only in multiplayer mode will you be able to earn these babies. Each multiplayer win means the next game is free! Grab all your friends and head to your nearest local arcade with *The Grid*!

Here's a list of the codes and the amount of money or kill points that you need in order for them to work:

2-2-6-#—Cameraman (must have at least 7,500 points)

MNEMONIC DEVICES

If you're having trouble memorizing some of the codes, just remember that the keypad buttons also have letters on them, just like on a telephone. Many of the codes have patterns that are easier to remember this way. For example, to get "Big Head Mode" you can just spell "BIG" on the keypad, these letters correspond to the numbers 2, 4 and 4, which as you can see is the "Big Head" code in numeric form. Other examples: "FAS" for "Fast Return," "WEP" to start with a weapon, "FRE" for "Free Look Mode," "KID" for "Grid Kids Mode," "RND" for random select, "BAZ" for Bazookas and "CNN" for Cannons. Also note that most of the secret character codes are the same as the first three letters of the character's name (e.g. "SCO" for Scorpion). The only exceptions to this rule are Darla ("DRL") and the Blue Ninja ("BNJ").

OTHER SECRETS

You won't find them in *The Grid*'s original production run of 200 cabinets (unless some kind of upgrade chip is made available), but the newer machines have two additional hidden characters. Noob Saibot can be accessed by going through all 10 towers in the single-player game! If you go through all 10 towers a second time, you'll receive a secret code; go through a third time to unlock the final hidden mystery character!

SELECT GAMES

Hey, you—listen up! This isn't your typical "review/preview" section. The purpose of *Select Games* is to show you a bunch of games that are out there—or are coming out soon—so YOU can decide which ones you'd like us to cover with in-depth strategy guides in future issues! See that postcard that's stuck between pages 82 and 83? Rip it out and write down the names of the games you're interested in. Drop it in a mailbox; we'll total up the responses and give you the kind of coverage you asked for!

Pick it!

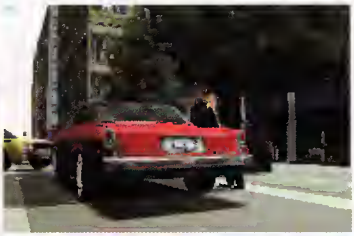
The elite "*Tips & Tricks* Pick" is given to those select few games that are highly recommended by the *T&T* staff after we've tested them thoroughly. Many hot games that are previewed here are not eligible for the pick until they are considered "reviewable" by the publisher, which means they're finished or nearly finished. Pay special attention to the picks; these are our favorites!

Watch for it!

Games with the *Super Import* symbol were only available in Japan at press time. Be on the lookout for a possible American release sometime in the near future!

DRIVER 2

Infogrames • 4th Quarter • 1-2 Players



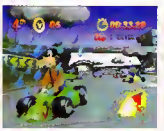
Tanner, the smooth-talking, weathered driver, is back behind the wheel in *Driver 2*. Once again, Tanner enters the ugly underbelly of urban crime as he goes undercover as a point man for a powerful crimelord who is impressed by his superior driving skills. Violence threatens the city of Chicago when a shady deal between U.S. and Brazilian gangsters turns sour. Tanner's job is to defuse the situation as he travels between the streets of Chicago, Las Vegas, Havana and Rio. Reflections, the developer of the *Driver* series along with *Destruction Derby 1* and *2*, is focusing on a stronger sense of realism in *Driver 2*. In the first *Driver*, pedestrians merely walked or sat. This time, the city folk will walk in and out of buildings, lounge at the café, shoot the breeze with neighbors and even chill at the beach. With this enhanced game engine for walking characters, *Driver 2* will also allow Tanner to get out of his car and move around freely. With a bigger variety of vehicles—including trucks, buses and vans—Tanner can now jump out on foot and carjack a better ride that suits his needs as in *Grand Theft Auto*. Tanner will also be required to walk into buildings, giving some missions a more satisfying ending than just simply pulling up to the area in your car. The main focus of the game, of course, is driving, with about 85% taking place in the car and 15% on foot. Greater attention is being given to the layout of the roads in the four new cities. In the first *Driver*, much of the landscape was flat with occasional hills. In *Driver 2*, the roads will bend around on top and underneath other roads, creating overpasses and underpasses. Freeways will be more realistic with proper merge and exit ramps, forcing drivers to actually use an exit lane while getting off. The overall city will also have more curved roads rather than the brutal 90° sharp corners in the first game. A new split-screen two-player mode will be added with destruction, chase and checkpoint-style racing games. If you played *Driver*, then you definitely know what you're in for; *Driver 2* seeks to top an already amazing PlayStation game. If you're sitting around thinking that *Driver* is merely for racing fanatics, then you're missing out on a true gem of a game. Shame on you!

MICKEY'S SPEEDWAY U.S.A.

TIPS & TRICKS PICK!

Nintendo • November • 1-4 Players

At the recent Nintendo Gamers' Summit—an annual event held for the press up in Seattle—we got an early look at *Mickey's Speedway U.S.A.* and tore around a couple of laps with our favorite Disney characters. Don't let the cute and cuddly Disney license fool you, this is one of the most finely-tuned kart racing games since Nintendo's own *Mario Kart 64*. Choose between Mickey Mouse, Donald Duck, Minnie Mouse, Daisy Duck, Goofy and others. Each racer has his or her own strengths and weaknesses with Mickey being the most "balanced" character. Mickey and friends get to race around famous American sites like Yellowstone Park, the Grand Canyon, New York City and Las Vegas. Like many kart racing games, there are tons of power-ups and weapons to keep the races even. The game contains plenty of speech and taunts from every character and actually features the authentic voice actors from Disney's animation studios. Each speech or taunt reflects the type of interaction each character has for each other. For example, when Mickey blasts a missile at Donald Duck, he'll laugh at his follies. If he makes Minnie slip on an oil slick on the other hand, he'll apologize while getting a good tongue-lashing from his girlfriend. *Mickey's Speedway U.S.A.* is another solid game from Nintendo's favorite developer, Rare. The only downside we can see is the outrageous suggested retail price of $69.95!



DEAD OR ALIVE 2: HARDCORE

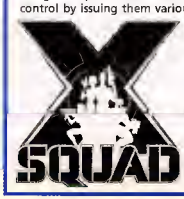
Tecmo • November • 1-2 Players

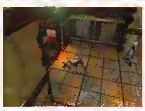
Originally, Tecmo planned to have *Dead or Alive 2* come out only for the Dreamcast in the U.S. while releasing *Dead or Alive 2* only for the PlayStation 2 in Japan. That has all changed, however, as Tecmo obviously can't pass up on the massive anticipation for the U.S. launch of the PlayStation 2! Bring in *Dead or Alive 2: Hardcore* for the PlayStation 2, an amped-up version of the *Dead or Alive 2* that was released in Japan. *DOA 2: Hardcore* will feature a better graphics engine plus new costumes, stages and even more unlockable secrets. Another cool feature will be the option to hear either the new American voice-overs or the original Japanese taunts with English subtitles. There isn't much more information from Tecmo yet on this title, but you can bet it will give Namco's *Tekken Tag Tournament* a run for its money when both games hit the stores alongside the PlayStation 2.

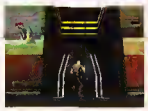
X SQUAD

Electronic Arts • November • 1 Player

Originally called *X Fire* in Japan, *X Squad* is the first original title developed by EA's Japan studio, which for years just translated EA's North American titles for the Japanese market. *X Squad* puts you in the shoes of the leader Ash in the year 2037. A nasty plague has spread throughout the city, and you and your squad's job is to defeat the bioterrorists who started all this mess. *X Squad*'s main gameplay focus is pretty straightforward: Walk around the halls and rooms and shoot everything in sight, much like *One* or *Fighting Force*. You will be in charge of up to four other squad members who you can peripherally control by issuing them various commands. Each squad member has a special skill like hacking, demolitions or sniping. Using a squad member's particular skill and giving the right orders will allow you to successfully complete each mission. Ash can collect all kinds of weapons and power-ups as he marches through the levels. *X Squad* is not a very complicated endeavor, but even a high-end console like the PlayStation 2 deserves its share of simple, arcade fun.







WCW BACKSTAGE ASSAULT

TIPS & TRICKS PICK!

Electronic Arts • 4th Quarter • 1-2 Players

Any wrestling fan knows that there's more activity backstage than in the ring these days, whether it be in the locker rooms, the garage or even in the bathroom. After the positive response behind *WCW Mayhem*'s locker room brawls, the folks at EA decided to bring all of the action backstage and away from the ring. *WCW Backstage Assault* features all the WCW stars and even includes the female wrestlers who were missing from *WCW Mayhem*. All the standard wrestling moves are intact, but what really separates this game from other wrestling games is the sheer number of objects you can pick up and use against your opponents. In the bathroom, for example, you can pick up the sink, the urinal or the hand dryer and slam them over each other's heads. In the garage, you can pick up a two-by-four, run over to the burning torch, light the wood and set the other guy on fire! Wrestlers can throw each other into other rooms as they rumble through a large map of unique areas with their own unique objects. *WCW Backstage Assault* will also be available for the PlayStation this winter.

THE BOUNCER

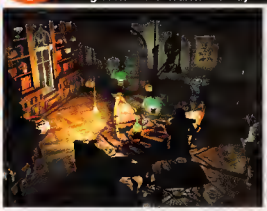
Square/EA • 4th Quarter • 1 Player

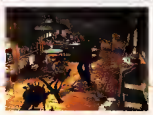
Some details have come to light regarding the much-anticipated PlayStation 2 title from Square, *The Bouncer*. The game begins with Sion Barzahd, a nineteen year-old bouncer, relaxing as he waits for his shift to begin at a bar called Fate. He is startled by his girlfriend, Dominique, when she tugs on his headphones to say, "Good Morning!" Sion, Dominique and fellow bouncers, Volt Krueger and Kou Leifou, enjoy a quiet morning when suddenly the sound of shattering glass kills the tranquil moment. As soon as Scion is able to gather his senses, he finds himself surrounded by a group of intruders and a brawl ensues. As Sion, Volt and Kreuger fight for their lives over broken tables and chairs, Dominique is captured and the intruders flee. Surveying the damage in the bar, the three bouncers determine that a group called Mikado is responsible for Dominique's abduction. And so the adventure begins. Square is calling *The Bouncer* a role-playing action title and it will be in DVD format. The DVD format's large capacity will allow all in-game dialogue to be done in voiceovers. Gameplay details are still very vague, but *The Bouncer* could end up being the most impressive title in the PlayStation 2's early line-up.

ALONE IN THE DARK: THE NEW NIGHTMARE

TIPS & TRICKS PICK!

Infogrames • 4th Quarter • 1 Player



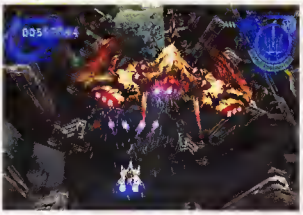


Alone in the Dark, quite possibly the most disturbingly named franchise in the survival-horror genre, was chilling spines back when "the master of unlocking" was still cutting her teeth. The latest installment, subtitled *The New Nightmare*, thrusts supernatural private detective Edward Carnby deep into the bowels of a world reminiscent of H.P. Lovecraft's worst nightmare. The intrepid Carnby seeks to avenge the death of his best friend, Charles Fiske, and bullheadedly proceeds to retrace the steps that led to Fiske's untimely demise on the ominously-named Shadow Island. Ancient terrors and unholy creatures lurk around corners and wait on ceilings as Carnby navigates the twisted landscape, fending for his life, his sanity and his soul while searching for the artifacts that contain the answers to his questions about his friend's death. Complicating the equation is Aline Cedrac, a young archaeologist who is on a quest to discover those same artifacts for reasons that may not be entirely selfless. Players can choose to control Carnby or Cedrac and have an entire arsenal of supernatural weapons and tools to aid their quest. Trial and error will determine the best application for the tools; for example, a flashlight is vital to progress in the game, but its light will attract one type of enemy while repelling another. Puzzle-solving is also a key element to progress, and the flashlight will help illuminate items that may be hidden in the shadows. Filled with intrigue, suspense, barely-glimpsed snatches of *what-the-heck-was-that* trepidation and gorgeously macabre Dreamcast environs, *Alone in the Dark: The New Nightmare* seeks to plunge its icy tendrils deep into your chest and rip out your still-beating heart as you exult in the adrenaline rush of pure terror.

SILPHEED: THE LOST PLANET

Working Designs • November • 1 Player

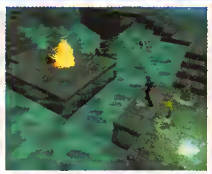
From the famous developer known as Treasure comes this latest incarnation of *Silpheed* for the PS2. Originating in the 1980s as a computer game by Game Arts, *Silpheed* is like a cockroach that never goes away; it appeared again in 1994 as a Sega CD game. Just when you thought it was safe to go outside again, back it comes for a third time. This new remake boasts incredible graphics and fantastic visual effects—as did the Sega CD version in its time—but the game mechanics have not changed one bit since the original version. You can only change weapons between stages, there are no power-ups and none of the new weapons you obtain seem to be quite as effective as the ones you start out with. Aside from the improved graphics, the best things about this new version of *Silpheed* are the occasional sparks of interesting gameplay interactions that Treasure (the developer of *Gunstar Heroes*, *Guardian Heroes* and *Mischief Makers*) is known for.

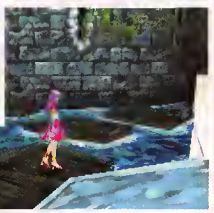


ORPHEN: SCION OF SORCERY

Activision • November • 1 Player

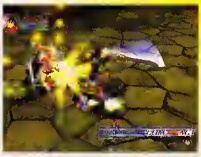
Activision's latest PS2 game is a translation of the Japanese game *Sorcerous Stabber Orphen*, also known as *Majutsushi Orphen*, which roughly translates to "Magic Arts Soldier Orphen." While it's fairly unknown in America (this explains the bizarre new title), *Majutsushi Orphen* was originally a Japanese comic which later became an animated series. One little-known fact is that the developer of this game, Shade, also programmed *The Granstream Saga*! This is Shade's first post-PlayStation console effort, and even as an action/RPG many of its elements are more focused on the RPG side and less so on the action. For example, even through there are action sequences where you must dodge obstacles, jump over pits and battle enemies, whenever you fight a boss you can't move around at all—you can only cast different spells! Boss battles are not turn-based, but since you're relegated to just pressing different attack/defense buttons at different time intervals, it really makes you feel like you're not really directly controlling your character's actions. This huge change of focus in gameplay style is certainly unique, although most gamers who aren't rabid anime otaku may find it awkward. On the other hand, the anime sequences are some of the sharpest and cleanest animation we've seen, even for a DVD.



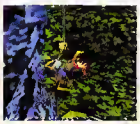


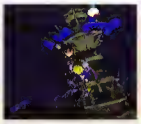
GRANDIA II

Ubi Soft • December • 1 Player



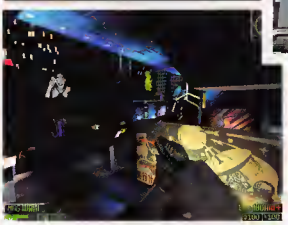
Grandia II is the follow-up to the extremely popular role-playing game *Grandia*, which came out for the PlayStation last year. In Japan, *Grandia* was originally released for the Sega Saturn back in 1997. The *Grandia* series thus makes its return to the Sega fold as *Grandia II* is exclusive only to the Dreamcast. The main character, Ryudo, is a vagrant sword-for-hire who begrudgingly takes on a job to escort Elena, a priestess of Granas, to participate in a secret ceremony. During the mysterious ceremony, something goes horribly wrong and Ryudo jumps in to save Elena from the clutches of an evil force. A simple escort assignment soon turns into a full-scale war between good and evil as Ryudo finds himself destined to save humanity. Much of the same features found in *Grandia* return in *Grandia II*, like the ability to rotate the camera angle a full 360°. Also making its return is the Initiative Point gauge system which combines turn-based and real-time battle sequences to create a unique approach to gameplay. The graphics in *Grandia II* really show how a traditional RPG can graduate to a stunning and immersing 3-D world. *Grandia II* is a very special game for Dreamcast owners who are looking for more traditional elements in an RPG game, including complex characters and a deep, involving storyline.

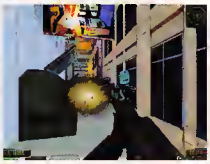


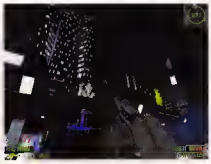


SHRAPNEL: URBAN WARFARE 2025

Ripcord • November • 1-4 Players







Ripcord Games prides itself in making games that simulate actual wartime scenarios and weaponry. You won't find fancy laser guns or plasma rifles in many of the company's first-person shooters, like the *Spec Ops* series. In *Shrapnel: Urban Warfare 2025*, however, Ripcord bends some of those rules by featuring futuristic weapons, albeit based on formerly-classified munitions designs. *Shrapnel: Urban Warfare 2025* was originally called *M.O.U.T. 2025* and was planned as a continuation of the *Spec Ops* series, but its theme warranted its own series. The game focuses on the confusion of urban warfare, one of the most difficult tactical operations during a war. The combat is based on true-to-life classified infantry strategy for infiltrating city dwellings. The environments all have an industrial metropolis look with plenty of neon lights and projection screen billboards. *Shrapnel: Urban Warfare 2025* will be part of the SegaNet line-up and will feature multiple online gameplay modes for up to eight players, including deathmatch, cooperative team play and objective-based missions.

GUNGRIFFON BLAZE

Working Designs • November • 1 Player

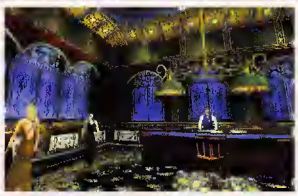
Here's another game series that's enjoying a makeover on the PS2. The original *Gungriffon* was released here in 1996 for the Sega Saturn, designed and developed by Game Arts. It was lauded for its fast action and responsive gameplay, a feature that always seemed necessary for a mech game, despite the fact that most games of that genre contained interfaces that were complex, slow and clunky. *Gungriffon Blaze* is perhaps everything that the originals were supposed to be, had the proper resources been available. The format of this new installment is true to the original, it just looks a great deal better. The only drawback is that the control scheme may be a little too complex for beginners. Those gamers who are experienced in other mech games like *Armored Core* may also be initially frustrated since the button configuration is so different. Let's hope the Working Designs will add a much-needed custom button configuration mode instead of forcing the player to choose from a number of presets.

THE WORLD IS NOT ENOUGH

UPDATE!

TIPS & TRICKS PICK!

EA • November • 1-2 Player



Another look at the PlayStation version of *The World is Not Enough* had us blown away! This is definitely what PlayStation owners have been looking for: a fast-paced first-person shooter with fluid controls. Many first-person shooter games for the PlayStation have horrible aiming controls (but we won't name any names). *The World Is Not Enough* has an auto-targeting system that keeps you from squinting and adjusting tiny crosshairs. The most impressive feature, without a doubt, is the graphics. The folks at Black Ops—developer of the PlayStation version of *The World Is Not Enough*—have really outdone themselves with the beautiful textures, colors and character models. It is one of the best-looking PlayStation games to date. The game follows the movie's plot very closely and utilizes cut-scenes from the film to create a seamless presentation. It's not all lead-pumping action for Bond; you must make good use of Q's gadgets to fulfill your missions. There's even a small mini-game where you have to make money playing Blackjack at the casino! The game also has plenty of humor; you'll have to check everything out because you'll never know what the developers stuck in for a few laughs. *The World is Not Enough* is one sleek and polished title, just like the Man himself.

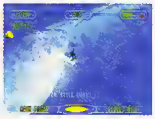
CHAMPIONSHIP SURFER

TIPS & TRICKS PICK!

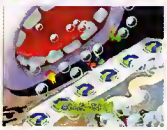
Mattel • November • 1 Player

Championship Surfer is being created by Krome Studios, an Australian developer made up of surfer dudes who want to make the ultimate surfing game. The game will feature eight members of the O'Neill World Championship team, including Cory Lopez, Jason "Rat Boy" Collins and Rochelle Ballard, to name a few. The action takes place on a fictional South Pacific island with ten selectable beach locations, each with its own unique wave formations and varying weather conditions. There's something relaxing about this game, possibly because of the island climate and the lazy "vacation" feel. *Championship Surfer* is a good pick-up-and-play game, but it also offers more challenging modes if you really get into it.



MARIO PARTY 3

Nintendo • Possible 2001 • 1-4 Players



More multiplayer fun is on the way for the N64 with *Mario Party 3*! The game is being released in Japan this December and should be making its way to the U.S. by early next year. This party will feature ten board maps and a whopping 70 all new mini-games. A new mode will be introduced in *Mario Party 3* called, Dual Map system. It will allow you to bring along a "help" character that you can call on at anytime during a one-on-one match against a friend. This means that you can still enjoy a one-on-one match-up with several characters without having to play against the annoying computer-controlled players, which some people have claimed to be cheating in *Mario Party 1* and *2*!

TONY HAWK'S PRO SKATER 2

TIPS & TRICKS PICK!

Activision • November • 1-2 Players

Tony Hawk's Pro Skater 2 is going to be another monster title for Activision this holiday season after the huge success of the first game. Many developers have since hopped on the skateboarding bandwagon with attempts to imitate *Tony Hawk*, but no one has come close. The secret to the *Tony Hawk* series is probably its perfect balance between simulating real-life skating moves contrasted with all-out arcade fun. Players earn money as they skate and complete various objectives laid out for each course. The money can buy different trick sets, clothing or the ability to increase various player attributes to improve the skater.

The Dreamcast version of *Tony Hawk's Pro Skater 2* is a direct port of the PlayStation version, offering the exact same gameplay modes. We're sure you don't need to hear it from us to demand this game for Christmas!

COOL BOARDERS 2001

Sony • November • 1-2 Players

The *Cool Boarders* franchise continues into the new millennium! *Cool Boarders 2001* is a little more hardcore compared to the rest of the series. The difficulty level is pretty challenging right from the start, so you will need to be a little familiar with the controls if you're a beginner. The game features a new fighting mode that can be turned on or off. You can punch your fellow boarders as you plow down the hill, much in the same spirit as *Road Rash*. You can select various snowboarding gear from a a huge line of top manufacturers, including Nike, Billabong, Vans, Burton, Forum, M3 and more! Featuring 300 all-new motion captured animation sequences from various pro snowboarders, *Cool Boarders 2001* should be the most realistic snowboarding game this winter.

MEGA MAN XTREME

Capcom • November • 1-2 Players

Fans of the blue bomber may be pleased to see him running rampant in his first Game Boy Color cart...but as the title suggests, this game has more in common with the *Mega Man X* series, which includes games that are known to be more difficult and more serious in tone than the standard *Mega Man* games. An all-new adventure, its story revolves around a new ally named Midi, a new enemy named Techno and two brand new "boss" characters. Players who clear the first set of stages should not be surprised to find a different set of levels available in the second round. *Mega Man Xtreme* is also compatible with the original monochrome Game Boy and features a convenient "auto save" feature that makes continuing easier for gamers on the go.

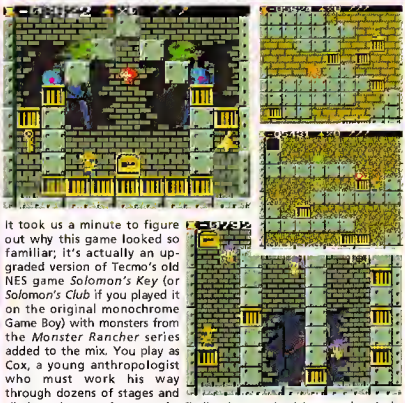
DRAGON'S LAIR

Capcom • November • 1 Player

Capcom scored big when it acquired the rights to this vintage arcade conversion. This isn't the first cartridge-based version of the classic laserdisc game, but it is the first one to actually duplicate the coin-op experience through the use of full-motion video sequences stored directly on a ROM chip. This technique has been used sparingly on the Game Boy Color—most notably in the introduction sequences of *Disney's Tarzan* and *Star Wars Episode I Racer*—but developer Digital Eclipse must have some super-heavy-duty compression technology, 'cause this is the first time that anyone has attempted to make an entire full-motion video game without the use of a laserdisc or CD-ROM drive. Not only does it look awesome, but we've been assured that all of the game's sequences—including the "mirror image" scenes—will appear in the proper order as in the coin-op original.

MONSTER RANCHER EXPLORER

Tecmo • Available Now • 1 Player



It took us a minute to figure out why this game looked so familiar; it's actually an upgraded version of Tecmo's old NES game *Solomon's Key* (or *Solomon's Club* if you played it on the original monochrome Game Boy) with monsters from the *Monster Rancher* series added to the mix. You play as Cox, a young anthropologist who must work his way through dozens of stages and climb to the top of a tower by finding keys and solving puzzles. As in *Solomon's Key*, Cox use his hammer to create boxes out of thin air or smash them to bits. Trapped in the tower are "Good Guy" and "Bad Guy" monsters who can be sealed in saucer stones and regenerated at the shrine, where they will join your quest and provide you with special abilities. Finding our old pal Suezo, for example, will allow Cox to see all of the hidden items on any stage. You can even create your own stages and share them with friends by using the Link Cable.

ULTIMATE FIGHTING CHAMPIONSHIP

Crave • November • 1-2 Players

Like the award-winning Dreamcast title of the same name, the Game Boy Color version of *Ultimate Fighting Championship* will attempt to recreate all aspects of a UFC presentation on TV, complete with real-life fighters, logos, theme music and more. Naturally, the UFC's official announcer and head referee—Bruce Buffer and Big John McCarthy, respectively—will also be on hand for the festivities. In addition to three fighting modes—Championship, Versus and Survival—the game will also feature a training mode in which you can help your favorite fighter to learn special moves from McCarthy himself.

Secret Codes

Each of the following codes can be entered on the floor of the Puzzle Room inside the sand castle in the Treasure Trove Cove stage; just plop some eggs into Leaky the bucket so he'll drain the pond and you can walk inside. Use the Beak Buster move on the lettered tiles to spell out the code words as follows:

• Enter "CHEATLOTSOFGOESWITHMANYBANJOS" to earn infinite lives.
• Enter "CHEATANENERGYBARTOGETYOUFAR" to max out the capacity of your energy bar at eight honeycomb pieces.
• Enter "CHEATDONTBEADUMBOGOSEEMUMBO" to earn infinite Mumbo Tokens.

• Enter "CHEATBANJOBEGSFORPLENTYOFEGGS" to earn infinite eggs.

For each code, you will hear a "Moo!" sound when you enter the first five letters; if you do not hear the "Moo!" during the first five letters, exit the sandcastle and go back in. You will not hear any special sounds when you enter the remaining letters of each code, so take your time and aim carefully.

Bottles' Bonus Codes

Enter Banjo's house, stand on the yellow lines on the carpet directly in front of the fireplace, then press the C◆ button to enter the first-person camera view. Now look directly at the picture of Bottles on the wall; Bottles will give you a puzzle to solve. If you solve the puzzle, he'll reward you with a secret code which you can enter in the sand castle in Treasure Trove Cove (as described above under "Secret Codes"). Note: Bottles will not allow you to access the puzzles until you have obtained the puzzle piece from the sand castle. There are seven codes available if you can solve all of the puzzles. IMPORTANT: The codes are listed below for reference only; they will not work unless you actually earn them by beating the puzzles that release the codes.

• Enter "BOTTLESBONUSONE" to give Banjo a big head.
• Enter "BOTTLESBONUSTWO" to give Banjo big hands and feet.
• Enter "BOTTLESBONUSTHREE" to make Kazooie big.

THE HISTORY CHANNEL PRESENTS: MODERN MARVELS

VIDEO GAMES
BEHIND THE FUN

When your story makes it into The History Channel, you know you've entered into the prestigious world of academia. Believe it or not, on October 9th, The History Channel aired a special on video games in its *Modern Marvels* series called "Video Games: Just For Fun." The show covered everything from the early days of *Pong* all the way up to the modern onslaught of Dreamcast and PlayStation 2. The people behind the games were also featured, including early pioneers like Steve Russell, the M.I.T. student who created *Space War* on a giant, barbaric computer back in 1962, and Ralph Baer, a military defense contractor who got the idea of the home video game console while staring at a bank of TV sets at an airport in 1966. Big names in the video game industry were also interviewed such as Trip Hawkins, CEO of The 3DO Company, Eugene Jarvis, creator of *Defender*, Richard "Lord British" Garriot, creator of the *Ultima* series and many others! The show not only talked about the history of games but also took you behind the scenes to show how modern video games are made. The amount of game footage shown was absolutely obscene, including everything from *Syphon Filter*, *Ready 2 Rumble*, *Final Fantasy VIII*, *GoldenEye* and even *Shenmue*! The History Channel often reruns its shows several times over the course of a year, so keep an eye out for future show times because this is must-see-TV!

DIDDY KONG RACING

Play as Drumstick

To play as Drumstick, you must first earn all of the trophies and amulets in all stages. Once you've done this, return to the main area where Taj can be found and look for the frogs that jump around in the watery area in front of the giant WizPig head. One of the frogs will have a red rooster comb on its head; if you touch that frog with your vehicle, Drumstick will be released.

Play as T.T.

To play as T.T., you must race on each course in Time Trial mode until T.T. comes out to challenge you; he won't appear until you beat the pre-programmed track record in a particular track by a fairly large margin. When he challenges you, you must defeat him in a race on that course. Once you beat him in a particular track, a small T.T. icon will appear when you select that track in Time Trial mode. When you beat T.T. and earn this T.T. symbol in every single track, T.T. will appear as a playable character.

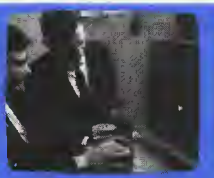
Electronic Arts co-founder Trip Hawkins discusses the mass appeal of video games.

These dudes may look like they're playing *Breakout* in the '70s, but they're really Y2K retro-gamers!



Back in the '60s, the first games were played on circular oscilloscope screens like this one.

The show's highlight: this brief, out-of-context clip of rock legend Ronnie James Dio playing *Asteroids*!

We've written about a lot of wacky things in *Tips & Tricks* over the years, but this is the first time we've ventured into the realm of independent film. Of course, we wouldn't be talking about it unless it was video game-related, and *Arcad-e-diots!* definitely fits that description. A half-hour short by New York-based filmmaker Richard D'Angelo, *Arcad-e-diots!* tells the tale of a legendary tournament-level video game champion who must face the showdown of a lifetime when his ownership of the King Vidiot trophy is challenged at the biggest video-game tournament of the year. Though the storyline goes off the rails a few dozen times (mostly due to a zillion subplots involving such dubious hangers-on as "Snapper Mike," "Dr. Bondo" and "Joe V."), we were fascinated by *Arcad-e-diots!* for one reason; namely, the aforementioned champion is played by James "MK" Fink, a real-life *Mortal Kombat* expert who also happens to be an old friend of *Tips & Tricks*. Fink is perhaps best known as the author of several different strategy guide books published by Brady over the last few years. In fact, those to bother to look at the writing credits of those books will also see D'Angelo's name listed as a contributor to some of them. Those who have met Fink at industry trade shows will definitely get a kick out of watching his thug-like, chain-smoking antics in the film, which is also recommended for anyone who ever spent too much time hanging out in their local arcade. For more information on the film, contact D'Angelo at P.O. Box 360, Oyster Bay, NY 11771 or look up *Arcad-e-diots!* on the Internet at www.arcad-e-diots.cc.

TIPS & TRICKS Book Review

S.D. Perry's novelizations of Capcom's *Resident Evil* series continues with *Resident Evil: Nemesis*, which closely approximates the conditions of *Resident Evil 3*. The book closely parallels the events that unfold within the game as Jill Valentine tries to escape Racoon City while being stalked by Nemesis. Although Perry takes some creative license, throwing in sexual tension between Jill and Carlos Oliviera, "She'd seen that look before, from other men—and she wasn't sure how she felt about it from Carlos," she also provides explanations for the behavior of Nicholai Ginovaef, the reasons for Jill's lockpicking prowess and the bizarre architecture and puzzles strewn throughout Raccoon City. There are also minor changes; for example, instead of unbelievably being able to mix up a T-virus antidote for Jill in the lab by following instructions on a sheet of paper, Carlos unbelievably finds it dropped on the floor by a psycho right before a gigantic explosion. Gamers who played through *Resident Evil 3* will recognize various people, landmarks and puzzles mentioned throughout the book. Although its subject matter is horrifying—Umbrella is using Raccoon City as a testing ground for its pet projects—it's also so familiar and natural to anyone who's played the games that it's more like a campy romp through an old neighborhood; except in your case, you know is a zombie. Although this is definitely not a novel for a serious horror enthusiast, it's light-reading that can while away an afternoon. If you're interested in reading the books in sequence start out with *Resident Evil: The Umbrella Conspiracy*, which lifted insane dialogue verbatim from the first *Resident Evil*, like "You almost became a Jill sandwich!" Fanzine Patrol

Fanzine editor Cory You has folded his previous fanzine (*Digital Storm*) and created *DSX* in its place. Like most game 'zines, inside you can find everything from the standard game reviews to a few things that have absolutely nothing to do with video games. *DSX* is heavy on the satire, with its central piece a parody of the "Hsu and Chan" comic (which is something of parody itself in the first place.) This first issue also features reports on the *B4 Street Fighter* Championship, Defcon 2000 and lots of reviews. A word of caution: There's some lewd language in this 'zine, so steer clear if you're offended by such things. For a sample, send $1 to Cory You c/o *DSX*, 3655 Sunset Blvd. #71, Rocklin, CA 95677

STAR WARS: EPISODE I RACER

Cheat Menu
Choose "Tournament" from the main menu. When the "Select Player" screen appears, choose any "empty" slot. When the "Please Enter Your Initials" screen appears, enter the passcode "RRTANGENTABACUS" by holding the Z button and pressing L to select each letter. Note that this procedure is not the same as choosing letters with the A button; if you hold Z and select letters with L, your code will appear in much smaller letters in the lower left corner of the screen. Also, you must complete the code by continuing to hold Z as you highlight "END" and press L; the letters "OK" will appear in the corner of the screen if you've entered a code properly. With this code in place, release Z and enter your initials. Next, start a race and press START to pause. At the pause menu, press Left, Down, Right, Up on the D-pad; a new option called "Game Cheats" will appear. At the "Game Cheats" menu, use the joystick and D-pad to highlight the different options and change their parameters. You can make yourself invincible or "mirror" the track at this screen or even adjust the parameters that the game uses to determine when a collision will destroy your vehicle. Highlight "Edit Vehicle Stats" and press A to access another menu that allows you to tweak the performance of every vehicle in the current race. Also, if you set the "Debug Level" option to anything but 0, you can also use the following commands at any time during a race:
• Hold Up on the D-pad to fast-forward
• Hold Down on the D-pad to reverse at high speed
• Press Right on the D-pad to self-destruct
• Hold Left on the D-pad to make your vehicle invisible
• Hold Z + Left on the D-pad to see an x-ray view of the current screen (this also works at the menu screens after and between races)
Special Control Scheme
Using the procedure described above under "Cheat Menu", enter the passcode "RRDUAL" at the "Please Enter Your Initials" screen and remember to choose "END" with the Z and L buttons to get the "OK" signal. This code changes the game to allow you to use the analog joysticks on two controllers to drive your pod racer. Pressing Up on the joystick propels you forward, press Down to steer. The controller ports are assigned as follows:
Player 1, left pod: Controller 1
Player 1, right pod: Controller 3
Player 2, left pod: Controller 2
Player 2, right pod: Controller 4
Note that the controls may not work properly if you plug the extra controller(s) in after the game has already been turned on. For best results, make sure you have all of the necessary controllers connected to the N64 before you turn the machine on.

SPECIAL REPORT: CLASSIC GAMING EXPO 2000

Classic Gaming Expo co-founder John Hardie received a ton of support this year from fellow collectors Sean Kelly, Clint Dyer and Joe Santulli...and it's worth mentioning that all of these guys are also writers and editors from *Digital Press*, our favorite biodegradable video-game publication. The focus of these shows is "classic" (e.g. pre-1985) video games, but there were small amounts of 16-, 32- and 64-bit games circulating on the dealer floor and being mentioned in keynote speeches by the vintage game creators who continue to make a living by designing games. Though there was a high number of industry "celebrities" returning from previous expos, this year's "first-timers" included John Sohl (creator of *Astrosmash*, the best-selling Intellivision game ever released) and video-game collector/historian Russ Perry Jr. Many vintage coin-op

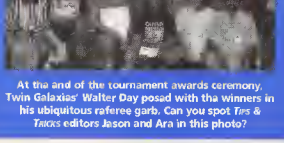
Talk about the ultimate endorsement! Ralph Baer—the man who invented video games—sat with his granddaughter at the Hasbro booth checking out the company's new versions of classics like *Frogger*.

arcade games were also set up for "free play"; those who earned the highest scores on several of them were awarded cash prizes as part of a large tournament ceremony sponsored by Walter Day and Twin Galaxies (see this issue's *Tournament Report* on page 118 for more details). We've had a great time at these expos for three years running—but since *Tips & Tricks* is not exactly what you'd call a classic gaming magazine, we usually attend the show as fans instead of journalists. However, we spent a lot of dough picking up classic gaming goodies this year, so we thought we'd share some of our finds with those readers who are interested in video-game history. Check out the following pages to see what kind of stuff we brought back with us...and visit www.cgexpo.com for more info on this and future shows.



At the end of the tournament awards ceremony, Twin Galaxies' Walter Day posed with the winners in his ubiquitous referee garb. Can you spot *Tips & Tricks* editors Jason and Ara in this photo?

ONCE UPON ATARI VIDEO SERIES

One of the first items we picked up at the Classic Gaming Expo was this VHS video from Scott West Productions. It contains the first two chapters of a planned four-segment documentary called "Once Upon Atari." The series' host and director is Howard Scott Warshaw, arguably the most high-profile game creator to remain at Atari Corp. while many of his co-workers were leaving for the greener pastures of third-party developers like Activision and Imagic. Warshaw created Yars' *Revenge*, *Raiders of the Lost Ark* and the ill-fated *E.T.* for the Atari Video Computer System (a.k.a. 2600), and his memories of working at Atari are almost entirely positive ones. Introducing each segment with a stylish tarot card motif, Warshaw gives the viewer a behind-the-scenes look at the day-to-day workings of Atari's game creators through interviews with other ex-Atari employees, his own recollections and a small selection of still photos. Each interviewee is introduced by having his or her name superimposed on the screen along with at least one title of a game that he or she worked on...and if there is one criticism to be leveled at the Once Upon Atari series, it is that these brief bios do not give enough info about the games each person worked on. For example, several people are credited with having contributed to *Pac-Man*, but we're not told which versions of the game they were associated with (and there were quite a few, considering that Atari published several versions of popular games like *Pac-Man* for many different non-Atari hardware platforms under the Atarisoft label). But this is a VERY minor complaint; for fans of video-game history, this tape is

STELLA AT 20 VIDEO SERIES

Like the "Once Upon Atari" series, these VHS videos from Cyberpunks Entertainment give an insider's look at Atari's history by inviting the viewer into what appears to be the home of Atari co-founder Nolan Bushnell during August of 1997 as he welcomes a living room full of ex-Atari employees to celebrate the 20th anniversary of the Atari 2600 (a.k.a. Video Computer System; "Stella" was the in-house code name for the machine's main processor). These two 90-minute videos are perhaps too dry and technical for the casual observer, but then, most Atari fans are rabid beasts whose interests in all things Atari are anything but casual! Plus, the series' producer Glenn Saunders knows when to cut the chatter, at one point producing a birthday cake in the shape of an old woodgrain 2600 machine! Given the warm and fuzzy nature of the reunion footage, there aren't too many shocking revelations or real surprises to be heard among these old friends' conversations. However, even those who would consider themselves fans of the works of David Crane (*Pitfall!*, *The Activision Decathlon*) may be amazed at the level of his accomplishments and the way he is singled out for praise by his peers. Listen as Larry Kaplan credits Crane with virtually all of the graphic design work on Kaplan's award-winning *Kaboom!* Watch as Carol Shaw points to the screen and identifies all of the elements of her hit game *River Raid* which were created and/or refined by Crane. MONSTER RANCHER 2

Secret Monsters

As in the original Monster *Rancher*, the best way to generate new and different monsters is by visiting the Monster Shrine and inserting different compact discs into your PlayStation; listen to the priest's instructions to find out how this is done. Any CD can be used, from your favorite music CDs to computer CD-ROM discs or even other PlayStation titles. The game reads some of the digital data from your CD and uses those numbers to generate a monster that you can raise on your farm. There are also many special monster types that can only be found by using ONE specific CD. For example, if you use Quiet Riot's *Metal Health* CD to create a monster, you'll get a creature called "Bloodshed" that you can't get from any other CD. The following is a list of these "special" CDs which can be used to create special monsters. Please be aware that the CDs on the following list are not 100% guaranteed to work with Monster *Rancher 2* the way they should. Occasionally an audio CD or PlayStation game will be re-mastered or re-released with slightly different track listings; if there are several different "pressings" of a particular CD, it may happen that your copy of the CD in question will not be recognized by the game and will not give you the monster you're expecting. *Ties & Tracts* apologizes for any such discrepancies you may encounter.

to his co-workers not in English but in the language of the Atari 2600...truly, David Crane is the man! It's also a treat to hear the recollections of Steve DeFrisco, programmer of the last 2600 game to be officially commissioned by Atari (*Klax*). DeFrisco may be the only game creator of his era to have had an idea of the historical significance of his work while he was still doing it (unlike greats like Rob "Demon Attack" Fulop, who still doesn't seem to truly realize how much joy and entertainment his work has brought to the world). The informal atmosphere seems to bring out more personal anecdotes than the types of stories that are related in keynote speeches at the Classic Gaming Expo. The tapes also include semi-formal interviews with individual designers or groups who worked together after leaving Atari. VIDEOGAME COMMERCIAL ARCHIVE VOL. 1

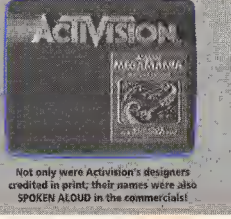
A "labor of love" assembled by supercollector/archivist Sean Kelly of *Digital Press*, this collection of vintage video-game TV commercials includes some true classics: George Plimpton hawking Mattel's sports titles over Atari, Billy Martin's rebuttal in the form of Realsports Baseball, Alan Alda's Atari computer spots...you'll even see a young Phil Hartman going berzerk over Activision's *Ice Hockey*! Kelly is said to have reviewed thousands of hours of early '80s television footage in order to find these gems...and as you can imagine, some of them are in pretty bad shape. Also, the tape's overall sound quality leaves a lot to be desired; it's practically impossible to understand the muffled voice that narrates the rare Odyssey 3 promotional footage. But hey; where else are you gonna find these classic TV ads? Only by sending $23 to Sean Kelly, 5789 N. Milwaukee, Chicago, IL 60646, or check out http://home.xnet.com/~skelly/video.htm.



Not only were Activision's designers credited in print; their names were also SPOKEN ALOUD in the commercials!

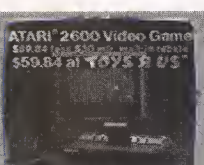
RESIDENT EVIL 2
Secret Photo
In the S.T.A.R.S. office, check Wesker's desk—it's the one right in front of the S.T.A.R.S. logo. You'll get a message that says, "It's trashed. Someone must have searched the desk..." Continue to check this desk over and over again; on the 50th try, you will obtain a film. Take the film to the darkroom to develop it and you will get to see a secret photo of Rebecca from the original *Resident Evil*.
Alternate Clothes
Start a game in Normal Mode and go through the city area (including the gun store and the bus) without picking up any items. If you go to the alley by the stairs in the R.P.D. lot, you will meet a very special zombie: It's Brad Vickers, the helicopter pilot from the original *Resident Evil*. Enter the police department and get the rifle/grenade launcher from the S.T.A.R.S. room, then go back out and kill Brad (you can't take him down with your normal gun). Next, check his body; you'll find a special key. This key opens the locker in the darkroom; if you open it, you will be able to change into a different set of clothing at any time.
Bonus Weapons
If you beat Scenario One with an "A" or "B" ranking and your total playing time is under two-and-a-half hours, you will get a rocket launcher with infinite ammo for your next game. If you beat Scenario Two with an "A" or "B" ranking in under three hours, you'll get a sub-machine gun with infinite ammo for your next game. If you beat Scenario Two with an "A" or "B" ranking in under two-and-a-half hours, you get both of these "infinite ammo" weapons plus a Gatling Gun, also with infinite ammo. You'll find the bonus weapons in the chest.
Secret Character: Hunk
To play as the bio-suit guy from the opening movie, you have to achieve an "A" Ranking in either Leon or Claire's Scenario Two; to do so, you must beat the scenario in under three hours without using any of the "infinite ammo" bonus weapons (see above). When you finish doing this, you will be asked to save a second time after the normal Scenario One/Scenario Two save. The saved game will say "Hunk," choose this to play as him.
Secret Character: Tofu
To play as a giant tofu, you must follow the instructions for playing as Hunk (see above). Once you've done this, you must continue playing until you have chained three sets of

Atari's *Joust* commercial had some way-cool special effects for an early '80s TV spot.



Hurry over to Toys 'R' Us before they're all gone! Oh, wait...it's the year 2000; they've been gone for years.

The Odyssey Wizard popped up during plenty of after-school specials to hawk Magnavox's wares.

There's even a rare TV commercial for the late, lamented Bally Arcade system on this video!

Scenario Ones and Scenario Twos (a total of six games). When you finish doing this, you will be asked to save an additional time. The saved game will say "Tofu," choose this to play as him. (Note: After you qualify for the "Hunk" save, you don't have to continue to get high rankings in order to access Tofu; just keep playing and always remember to save.)

RESIDENT EVIL 2 (DUAL SHOCK VERSION)
Extreme Battle Mode
Play through the game with either character and complete Scenario 2. After the credits roll, you will be rated as usual and a message will tell you that there is another mode. You will be asked to save the regular game and then it will ask you to save a second time for the Extreme Battle data. Extreme Battle mode can then be accessed by calling up the Load screen and selecting the EX Battle data from the Arrange Mode menu. If you're lucky enough to have kept a Scenario 2 save on your memory card from the original Resident Evil 2, you can use that with the Dual Shock version and simply complete the game to get Extreme Battle. When you beat the first level of Extreme Battle mode, you will earn the ability to play as Ada Wong; you can play as Chris Redfield if you beat the second level.

If you're wondering why anyone would give their publication such an unpronounceable name, it's because *Syzygy* was the name of Nolan Bushnell's company before he changed it to Atari. Publisher/Editor in Chief Jason Cody is a hardcore fan of vector graphics games, and he proves it by scoring interviews with Tim Skelly (*Rip-Off, Star Castle*) and Owen Rubin (*Major Havoc*). Issue 1 also reveals Marvel Comics artist Frank Brunner's long-lost cabinet artwork for the *Tail-gunner* coin-op. For a sample, send $7 to Jason Cody c/o *Syzygy*, P.O. Box 512, Flagler Beach, FL 32136, or visit them on the Internet at www.syzygy-magazine.com.

Fanzine Patrol

Joe Santulli's *Digital Press* has always been a great read that obviously takes a lot of time to assemble. However, issue #44 may have been one of the easiest issues to produce, because it mainly consists of reproductions of advertisements and promotional sales brochures for classic video game software and hardware that was never released, all from the archives of author Leonard Herman. How much of this stuff exists today, if it ever did? That's the question that keeps collectors up late at night and forces them out of bed early on weekends, in search of rare garage-sale and flea-market finds. Still the best video game fanzine out there; see for yourself by sending $2 for a sample issue to Joe Santulli *c/o Digital Press*, 44 Hunter Place, Pompton Lakes, NJ 07442, or visit them on the Internet at www.digitpress.com.

SPECIAL REPORT: CLASSIC GAMING EXPO 2000

Fanzine Patrol

We didn't actually pick up this 'zine at the Classic Gaming Expo, but we did run into its current Editor in Chief Russ Perry Jr. at the show, so we're sneaking it in at the tail end of our CGE2K coverage. Fans of the Atari 2600 console shouldn't miss an issue; even at eight pages, *The 2600 Connection* is always loaded with juicy tidbits and breaking news about newly-discovered prototype games. For a sample copy, send $1.50 to Russ Perry Jr. c/o The 2600 Connection, 2175 S. Tonne Dr. #105, Arlington Heights, IL 60005, or look them up on the Internet at http://2600connection.atari.org.

At the character-select screen, Player 2 must choose the same characters that Player 1 has chosen, but in the opposite order. (For example: If Player 1 chooses Cyclops, then Ryu, Player 2 must choose Ryu, then Cyclops.) If you've done all this correctly, when the fight starts you'll see that each of the four characters has his or her own energy meter. During the match, if you press **Fierce Punch + Roundhouse Kick** simultaneously (that's **L1 + R1** if you haven't changed the game's default control configuration) you will "tag out" and switch places with your partner, who enters with an immediate attack on your opponent.
• If you set the "Hyper Combo Gauge" option to "Full," your Hyper Combo Gauge will fill up to Level 3 automatically when playing in Vs. Mode.

New vs. Old?!

The PlayStation 2 is much more powerful than the Dreamcast, but many people seem to have been disappointed, expecting a more obvious gap in graphic quality. It's not because the PS2 isn't "better enough" than the DC. It's a side effect of how video game graphics technology is developing and foreshadows what we can expect in the coming years. This unexpected consequence is that the better graphics become, the more difficult it will be to make them even better, whatever your definition of "better graphics" may be. Let's compare the graphics of one game that will be released for both DC and PS2: *Dead or Alive 2*.

Below is a portion of the same screenshot from both versions of the game. The DC version is on the left, the PS2 is on the right. Notice that the complexity of each model is about the same, however the shading is slightly different. Kasumi's shoulders also look different, but it's not readily obvious which one is "better." The PS2 image seems to have additional shading that does not exist on the DC image, but once again the improvement is quite subtle. On the other hand, the edges in the DC image are smoother than the ones on the PS2.

POKEMON (Red, Blue and Yellow versions)

Celadon "Rocket Game Corner" Tips
• Slot Machines—Watching the reels carefully can increase your odds of getting a match. For example, watch for a particular image or number to scroll by, and hit the A button as soon as it appears for each reel. The chances of you lining up another image is fairly high, as long as you don't get dizzy staring at the tiny Game Boy screen. Although it's claimed that the slot machines inside this casino have different odds, watching the reels works on all of them.
• Secret Coins—After speaking to the other people in the casino to get coins, you can discover secret coins lying around the floor of the Game Corner by moving around and pressing A.
Evolution Tip
Some Pokémon can only be evolved through the use of elemental Evolution Stones. It is a bad decision to evolve your Pokémon right away, since there may be some attacks it can only learn in its Basic Evolution stage that it would never learn if you evolved it right away.
Hidden Machine Tips
• Hidden Machines, or HMs, are permanent. If you teach them to one of your Pokémon, they will never forget it; therefore, don't teach weak HM skills like "Cut" to a Pokémon you intend to use as part of your main party.
• HM 01 (Hidden Machine 01): Cut—When you use Cut in a grassy area, you will clear away four squares of grass. Using this method is one way to avoid random encounters with wild Pokémon.
Master Ball Tip
The Master Ball is an ultimate Pokéball that can capture any Pokémon instantly. It can only be used once, so don't waste it on a common Pokémon. It should be saved so it can be used to capture Mewtwo or one of the three Legendary Birds.
Fight Mewtwo
In order to fight Mewtwo, you need to gain access to the Unknown Dungeon. You must defeat the Elite Four before the man blocking the entrance will allow you through. Also, you must NOT reset your game after you've beaten it. Wait for the credits to finish, then go back to the Start screen by pressing the A button. Fly to Cerulean city, then use a Pokémon that knows Surf to get to the Unknown Dungeon, which lies to the northwest of Cerulean city. Right before you fight Mewtwo, save your game. That way if you lose or if Mewtwo faints, you can quickly reset the game. You should also do this before fighting other "one-time-only" Pokémon like Zapdos, Articuno and Moltres. When you fight Mewtwo, either use the Master Ball immediately or use sleep attacks and a lot of Ultra Balls.
Quick Experience Gain
If you have a group of strong Pokémon with one weak Pokémon, you can level up your weak Pokémon quickly by letting it share experience with a stronger one. Put the weak Pokémon at the top of the list so it always goes out into battle first. Switch it immediately with a strong Pokémon and the two will split the experience points in half. This is an excellent way to level up Pokémon like Magikarp, which are useless before they evolve.
Rare Candy Tip
Gaining levels by using Rare Candy on your Pokémon is not as effective as leveling up your Pokémon normally. Pokémon who legitimately gain experience improve their statistics more dramatically than Pokémon who only used Rare Candy, so it's not a good idea to use a lot of Rare Candy on one Pokémon at once, since it will be weaker than other Pokémon that are the same level.
Increase Stats
Use one of your Pokémon in battle until all of its PP for one move is depleted. Take it to a Poké Center to store it in Bill's PC, then immediately take it out again. Heal your Pokémon at the Poké Center, then check its statistics—you'll find that some of its attributes have slightly increased. This will occur even if you are using a Pokémon that is already at Level 100.

POKEMON: SPECIAL PIKACHU EDITION (Yellow version)

Level Up Pikachu
When playing *Pokémon Yellow*, your starting Pikachu will obey you no matter what level he is or how many badges your character has earned. Knowing this, one quick way to blaze through the game is to trade your starting Pikachu into another *Pokémon* game that you've already finished and quickly level Pikachu up by having him lead off during battles in the Elite Four tournament. When you trade him back into *Pokémon Yellow*, your character will have no trouble controlling him, even if his levels are maxed out and you haven't earned a single badge. This will only work with your *Pokémon Yellow* starting Pikachu, i.e. the one that follows you around everywhere.
Bucket Head Pikachu
Pikachu trails behind your main character during the game, and you can turn around and "speak" to Pikachu to get a graphical representation of what's on his mind. When you take Pikachu fishing, maneuver your character so you're standing beside Pikachu. After fishing, turn to speak to Pikachu and he will respond with a bubble over his head with a picture of a fish in it. Zoom in on Pikachu and you'll see that he's put your fishing bucket on his head!

Now look at this image of Ryu Hayabusa. Once again, the differences in shading are definite, but it's not obvious which one looks better. The DC is on the left, PS2 on the right. There is greater contrast in the PS2's image, but it also makes Ryu's arm look unnatural. However, notice that there is additional detail in the fence in the background of the right side of the screen of the PS2 image that doesn't exist on the DC! Plus, notice that the background texture in the bottom right corner is much more detailed in the PS2 shot than it is on the DC.

So what's the conclusion? Well, there are some things about the DC version of the game that look better, but there are other things about the PS2 version that look better. At best, it's a tradeoff, and the differences are subtle enough that it approaches the realm of personal preference. If one year and an extra 100 Mhz (among many other improvements) give us graphics enhancements this minute, developers may have to actually focus on gameplay and interaction to grab our attention!

first city, C to choose the second, etc. all the way up to the number 3 which represents the 25th city in the chosen area.
4 - B) Enter "B B B B N" as the fourth through eighth characters of your password.
9) Now you're at the last character of the password, so all you need to do is to try each character—one at a time—until you find the one that "locks" the password into place with a checksum. If you get sent back to the main menu when you press the A button, your password is in place, so just choose "Start Game" to begin.

HINT HOTLINES

If you're having trouble with a video game and you need IMMEDIATE assistance, follow these steps and you might get the help you need!

1) Examine the game, the box it came in or the instruction manual to find out the name of the game's publisher.

2) Check this page to see if that company has a tip hotline that you can call for advice!

3) If you can't find that company's name on this list, check the game, the box or the instruction manual to see if the publisher lists a phone number that you can call for tips.

4) As a last resort, if the game you're having trouble with is made for the Nintendo 64 or Game Boy (Color), try Nintendo's hotline; it's the only one we know of that can usually supply tips for third-party games.

5) Whatever you do, DON'T call *TIPS & TRICKS!* We don't have a tip hotline and we're very busy working on the next issue for you.

NOTE: All Hint Hotlines require a touch-tone phone; callers must be a minimum of age 18—or have parental permission—to call.

"...SORRY, SPIDEY, BUT TIPS & TRICKS DOESN'T GIVE OUT CODES OVER THE PHONE."

TIPS & TRICKS SPORTS DESK

General Truths of Football

I won't waste time with the obvious. Everyone knows you have to pass the ball to the open man, give the football to your best running back and cover receivers on defense—but it's not all that simple. All of the football games featured in *Tips & Tricks Sports Desk* this month have general trends for success because (of course) they are highly sophisticated simulations of FOOTBALL! This means that if you know enough about the real-life sport, you can crush ordinarily powerful gamers who spend their Sunday afternoons playing *Street Fighter*. A bit of general advice:

• All of the games are programmed to respect basic offensive tenets, e.g. punt on fourth down, don't try the same play over and over, etc. One of these basic tenets is running on first down. This usually establishes your running game and is good for experimenting, since three downs will remain after the play. If running the ball fails, you still have two downs to pass your way out. If it is successful, you either have another set of downs or a short yardage situation which will give you much more flexibility in play-calling (the less yardage required, the more short, easier passing routes you can run).

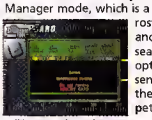
• Each game has its share of spin moves, hurdles and dives, but the best way to pick up yardage on the run (and after catches, if possible) is to exercise a little patience and *follow your blockers*. Nothing is as effective; just ask Emmitt Smith! If you're running the football, try to follow your linemen and pass by the defenders as they are getting knocked on their butts (or held, if you're the Raiders). Then, when you've identified your alley and know exactly where you're running, use the speed burst.

• Always try to pass to men who are ahead of the first down marker if you are throwing on third down; otherwise, you could get a big tongue-lashing from John Madden! Also, try to spot mismatches before you snap the ball. All of these games feature "zoom out" buttons that allow you to survey the entire field before the play begins. This is especially important on pass plays. If you can identify a man who will probably be uncovered as the play develops, you can zip it to him immediately after you snap the ball. The most commonly open men are your slot receiver or tight end (both cornerbacks are automatically assigned to your two primary wide receivers).

• The 3-4 defense was created in an era when there weren't too many good defensive linemen. As a result, coaches changed their defensive schemes to include their best players, which meant using three defensive linemen and four linebackers. When bigger D-linemen like William "Refrigerator" Perry started to emerge in the '80s, their presence became more necessary to stay competitive than the smaller linebackers. Hence, the return to the 4-3, which features four down linemen and three linebackers. In the NFL today, only three teams use the 3-4 defense...which means that unless you're playing as one of those three teams, you're not really getting your money's worth out of your defense. If you pick a team with a lot of great linebackers like the Ravens or Bills, the 3-4 can work for you; otherwise, stick with the 4-3...but only on first and second down. Unless you're looking at third and less than three, don't use anything other than the nickel on third down. The nickel features four down linemen, ONE linebacker and six defensive backs.

NFL GameDay 2001

The procedure of bringing players from *NCAA GameBreaker 2001* into *NFL GameDay 2001* is poorly explained in the *GameDay* manual. In the memory card mode of *GameBreaker*, you can save your seniors and then draft them while playing *NFL GameDay 2001*. While playing *GameDay*, do not try to load the seniors directly in memory card mode. Rather, initiate the General Manager mode, which is a simulation of a GM's career in which you get to make roster choices, sign free agents, draft rookies make cuts and so forth. Make sure you agree to conduct the pre-season activities. As you advance through pre-season options, you will have the option to import *GameBreaker* seniors from a memory card, if you have already saved them. Once you do this, you can enter the draft and compete for the best rookies to fill your team's needs. This seems like a great prospect; one could conceivably project next year's NFL with this year's college seniors! The reality, though, is that none of the real players are featured in *GameBreaker*. Though they may resemble their real-life counterparts in some ways, the seniors in *GameBreaker* have fictional names that rip off the last names of existing NFL players such as Ismael, Kitna, Jett, Vanover, Kaufman and McCaffrey. I know football runs in the family, but that's a little ridiculous. It's too bad, because the thought of drafting and using Drew Brees or Michael Vick is appetizing.



"Save Seniors" is an option in the memory card mode in *GameBreaker*.

You can only import *GameBreaker* seniors during the pre-season in GM mode.

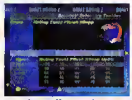
GameDay's GM mode must must be taken seriously at every step. A lackadaisical effort of week simulations without actual roster moves during the pre-season can earn you a pink slip within a matter of mere weeks. Graphics have improved, but as in past years, *GameDay* has a more arcade-like feel than its main competitor, which allows for unlikely kick returns and big plays that are a little too big.

NFL 2K1

Sega continues its line of Dreamcast sports games with Sega Sports' *NFL 2K1*. In addition to featuring fully licensed NFL rosters and logos, this game looks awesome. It really has the most realistic looking football animation available today, although the fluid and smooth player motion feels more like Steve Sabol's NFL Films highlights than the high-speed action we watch every Sunday. Like *Madden*, *NFL 2K1* has playbooks customized to each NFL franchise. However, all of that programming has a cost; the intelligence and realism are not as strong.

The Sweep is pretty much a "money" play in *NFL 2K1*.

For instance, sweeps are "money" plays on par with the *Maddens* of the early nineties that saw Emmitt Smith and Barry Foster rushing for 250 yard games and multiple 50+ yard touchdowns. This game isn't quite as bad as those days in this respect, but nevertheless, in a *2K1* playoff game between the Bears and the championship Rams, Curtis Enis rushed for 140 yards with five touchdowns—a career day for a guy who, in reality, is averaging about two yards a carry). The secret to cyber-Enis' success? Multiple sweep plays. The downfield blocking is so good in *NFL 2K1* that you barely have to pass. *NFL 2K1* also features a full franchise mode in which you can conduct a draft out of all actual NFL players and move through every week of the off-season before entering pre-season and then the regular season. If you're having trouble and getting beat down during network games by people on the other side of the globe, our own Jason Wilson suggests eating the clock more so your opponent has less possession time and won't run up the score. Try snapping the ball when the clock winds down to ten seconds or so; sometimes it even frustrates your opponent into blitzing, allowing you to make easy passes. *NFL 2K1* is thorough. It looks good, but it's no *Madden*...

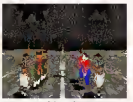


The Full Franchise Mode Fantasy Draft can be very fun!

Madden NFL 2001

Still alive and kicking after all these years, *Madden* continues to dominate the pro football gaming landscape. Every yard is earned in *Madden NFL 2001*; no "gimmes" like long breaking runs and multiple receivers going deep. To succeed in *Madden*, you really have to make smart play calls, know your team and make the proper reads as a quarterback. Jamming one in there will only get you an interception. In addition to the standard season and exhibition modes, this year's *Madden* has a two-minute drill option (for that quick game), a record book full of interesting NFL stats (for the true NFL historian) and a brand new "Madden Cards" mode. Based on ancient trading card principles, one acquires a collection of NFL trading cards through various means. By achieving certain goals (i.e. 100-yard rushing game, two 100 yard receptions in a game, five touchdown passes, etc.) you earn tokens that can be used to purchase packs of virtual NFL trading cards, which are then collected in a 33-page card album on your memory card. (There are nine cards per page; you do the math.) You can also trade cards with other collectors as well as hunt for secret cards that give you access to an array of oddities and tricks. Individual player cards can boost the stats of some of your players. For example, if you have a Ryan Leaf card, his stats will be boosted if you activate the card before playing a game. *Madden NFL 2001* features all of this and more—plus the standard commentary from the lovable ex-Raider Super Bowl coach himself and his longtime broadcasting partner, Pat Summerall, a one-time player who now—according to the *L.A. Times*—does 1,000 sit-ups a day. (If you've seen Pat, you realize this must be a misprint).

The Madden Cards also give you interesting cheats.



...like this "Maddenstein" stadium plus weird-looking players!

Reggie & Robert

As always, this year's *Madden* features a "create player" mode which the true enthusiast should take of advantage of. This year, two once-imposing ex-Green Bay one-time retirees have returned to the NFL. Here are the players and their respective team and stats. Note: You can also get a Reggie White Madden Card which is a much easier way to activate him as an available player, but doing so gives you his stats from 1991-1992, which is considered to be the peak of his career. CLASSIC GAMING EXPO TOURNAMENT!

Collaborating with show promoters for the second year, Twin Galaxies offered a vintage video-game tournament on 11 different games during this year's Classic Gaming Expo, July 29 and 30 in Las Vegas, Nevada. 11 winners took home cash prizes and will have their scores logged in the official *Twin Galaxies Book of Records Second Edition*. The main attraction, with cash prizes of $100 to $300, was the ten-game Atari/Coleco Decathlon orchestrated by Ron Corcoran, the Twin Galaxies Worldwide Editor for Atari 2600 games at www.snipercade.com. Atari 2600 games included *Yars' Revenge*, *River Raid*, *Kaboom!*, *Berzerk* and *Asteroids*. ColecoVision titles included *Zaxxon*, *Mr. Do!*, *Donkey Kong*, *Lady Bug* and *Mousetrap*. Cash winners were Patrick Wyrick in first place, David Nelson from New Hampshire in second and Thomas Taylor in third. Corcoran himself placed first for high score. In addition, players competed for $50 cash prizes for the high score on arcade titles donated by 8last from the Past in Simi Valley, California. However, no one claimed the $5,000 prize that *Pac-Man/Donkey Kong* world record holder 8illy Mitchell offered to anyone who could best the *Joust* world record. Our very own Ara Shirinian was the only newly-crowned world record holder of the show, finishing with an astounding 1,570,336 in *Toobin'* (only 7,000 points ahead of the second-place finisher!) The $50 cash winners included:

Arabian—85,100—Dave Taylor
Gyruss—256,200—James Redding
Joust—354,000—John Rhodes

MAY THE CUBE BE WITH YOU...

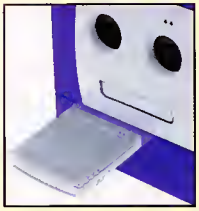
NINTENDO GAMECUBE

by Anatole Brown

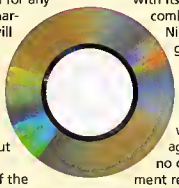
JAPAN REPORT!

The first official NINTENDO GAMECUBE image!

Nintendo finally revealed its new game console at the annual Spaceworld show in Japan this past August. The new system is called NINTENDO GAMECUBE; it's scheduled to come out in Japan in July 2001 and October 2001 for the U.S. (exactly one year after the release of PlayStation 2). The GAMECUBE, as its name suggests, is shaped like a box and supports the mini-DVD format, making it Nintendo's first disc-based system since the Famicom Disc System add-on (which never came out in the U.S.). The mini-DVD will be an exclusive format for the GAMECUBE and will not be used for any other entertainment component on the market. A 128-bit system, the GAMECUBE will compete against consoles like Sega's Dreamcast and Sony's Playstation 2. The dimensions of the GAMECUBE are as follows: 5.9" (W) X 6.34" (H) X 4.3" (D). This means that the surface of the GAMECUBE is about an inch narrower than the surface of the Dreamcast and the height is about an inch taller than two Playstations stacked on top of each other. It's definitely a cute little bugger! Like the N64, the GAMECUBE has four controller ports. The new controller's double handles vaguely resemble the shape of the PlayStation Dual Shock controller and features a large A button along with the usual analog joystick and directional pad. The yellow C buttons found on the N64 controller have been replaced by a multi-directional C "knob". The Z trigger has been moved over to the right shoulder just in front of the R button. At first glance the controller looks extremely complicated, but Nintendo claims that this is the result of careful and detailed research for maximum gaming enjoyment. The GAMECUBE will have modem and broadband network capabilities, but how they will be used is still vague at this point. The N-CUBE, as some "hip" people have begun to call it, also has a gray handle on the back so it can be carried around like a handbag. There are two slots on the GAMECUBE for memory cards called Digicards which will enable players to save their games. The new Game Boy Advance will also be able to link up to the GAMECUBE through the controller port; you can even use the new handheld system as a controller with its own built-in monitor for entering secret button combinations or choosing plays in a sports game.



The GAMECUBE Digicard looks a lot like a PlayStation Memory Card.

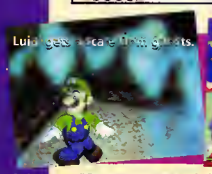


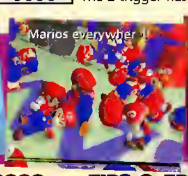
The 8cm mini-DVD disc holds 1.5GB of memory.

Nintendo stresses that the GAMECUBE is strictly a gaming machine and will not have distractions like a DVD player or Internet browsing tools, deliberately suggesting that Sony and Sega are on the wrong track. The big question obviously is the price when the system is released. Rumor has it that Nintendo will aim for a sub-$200 price range in the U.S., but again, these are only rumors. So far there has been no official announcement regarding software titles, but several graphic demos were shown to tease those attending Spaceworld 2000. To demonstrate the immense power of the GAMECUBE, Nintendo showed real-time footage of Link battling with Gannon, Luigi in a haunted mansion, Metroid running from little critters and Meowth rocking on the guitar. Shigeru Miyamoto, the creator of Nintendo's most prolific titles like *Super Mario* and the *Zelda* series, did a personal demonstration where hundreds of little animated Marios ran about fussing and screaming. In the demo, a faint logo reading "Super Mario 128" could be seen, suggesting that a new Mario is on the way. A new *Wave Race* title also seems to be a strong possibility as in-game footage was shown on the show floor following the hardware announcement. So there you have it, folks! With Nintendo's new console revealed along with Sony and Sega, we are officially in the next millennium of gaming. As Thomas Dolby says, "May the Cube be with you!"

The GAMECUBE looks as though it will be available in several different colors!

The Wavebird is a wireless controller unit and it's from Nintendo!





ADVANCE NOTICE

The Game Boy Advance was also revealed at Spaceworld 2000 along with several titles (see *Japan Report*, October). Release dates for the Game Boy Advance have been set: March 2001 in Japan and July 2001 in the U.S. When the system is released in Japan it will cost 9,800 yen (just under $100). The Game Boy Advance has a slightly larger screen than the Game Boy Color at 1.6 inches X 2.4 inches. It has a resolution of 240 X 160 dots and can display up to 32,000 colors.

GAME BOY ADVANCE™

The new Game Boy Advance cartridges will hold 256 Mbits of memory. It will also be able to play regular Game Boy and Game Boy Color cartridges as well. Two AA Alkaline batteries will last approximately 15 hours—just enough for an overseas flight! You can also connect up to four Game Boy Advances for multiplayer capabilities. The Game Boy Advance has the standard **START**, **SELECT**, A and B buttons found on the Game Boy, but new **L** and **R** buttons have also been added to enhance gameplay. We can already smell what the Big-N is cookin', and we want it now!

Blue and Orange seem to be the choice at this point.

They will connect to the GAMECUBE through the controller ports.

GET ON THE DINO BUS

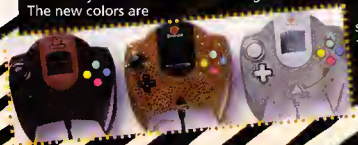
In order to promote the recent release of Capcom's *Dino Crisis 2* in Japan, several public transportation buses in Tokyo are donning a giant T-Rex design. *Dino Crisis 2* has a little more of an arcade feel compared to the first *Dino Crisis*, which was more of a *Resident Evil*-style game. With some massive promotional support for the game, Capcom hopes that it will appeal to a wider audience.

Wonderful Colors

Not to be intimidated by Nintendo's recent Game Boy Advance announcement, Bandai is planning to release a color version of its handheld game system, the WonderSwan, in December in Japan. The WonderSwan Color can display up to 241 colors at once and will be a little bigger than the current monochrome WonderSwan. It will also support a USB cable connection, allowing it to connect to most PCs and even the PlayStation 2. Several colors will be available at its launch: Crystal Blue, Crystal Black, Crystal Orange, Pearl Blue and Pearl Pink. An astonishing 32 game titles are currently planned for its release, including *Final Fantasy*, *Gunpey EX* and *Digimon Adventure*, to name a few. A color version of the WonderSwan bodes well for a possible U.S. release, but the recent failure of SNK's NeoGeo Pocket over here could also be discouraging. We can only wait and see.

Natural Controllers

Sega just released new assortment of colors for its Dreamcast controllers and accompanying VMUs in Japan. They are exclusive only to Sega's online stores so you won't find them in regular retail outlets. The new colors are sort of an ode to nature: Wood, Leopard Skin and Marble.



IT'S FOR KIDS!

Bandai released a special PlayStation controller for little kids called KidsStation. The controller is meant to be placed on the floor and it has four giant buttons: △, ○, × and □. There is no directional pad at all! Bandai and Banpresto will release several learning games for children on the PlayStation over the next several months that will teach children basic math, verbal and everyday skills. We just want the giant controller...but we can't think of any game besides the learning titles that uses only those four buttons. Can you?

Price: 1,165,900

Christopher offers up the second Core design based on a mobile suit from the popular *Gundam Wing* series. I happen to have a model of the Epyon Gundam standing atop the video monitor in my office, and it was fun to compare it with Christopher's *Armored Core* version on the screen. He's done a passable job with the coloring, even getting some of the little details like the trim around the base of the feet and on the chest as closely as possible. My Epyon model brandishes a wicked beam saber, and what other weapon in the *AC* world comes closer to those mighty blades than the Moonlight? But I digress. As a Core, Epyon is all about speed. Lightly armored but blazingly fast, the battle plan here is to boost around and above your opponent while pouring machine gun fire into his Core. The 1,000 round clip gives you plenty of ammo to fire and forget...and if there's anything left standing when it runs out, it's not too much of a problem with this speed devil to get in close and hack away with the Moonlight. Against slow, powerful Cores, Epyon has a distinct advantage as long as you make good use of the circle strafe technique and keep moving. This Core rules in arenas where there is a lot of cover; getting away from missiles is usually no problem unless you're caught in the open with no cover around. Another fast Core armed with a laser rifle is Epyon's most evenly-matched opponent.

Crusher

Designed by Joshua McDowell of Newark, Delaware

Parts
Head: HD-6-RADAR
Core: XXA-S0
Arms: AN-25
Legs: LBK5-2B45A
Generator: GBG-10000
Generator: GBG-XR
FCS: FBMB-18X

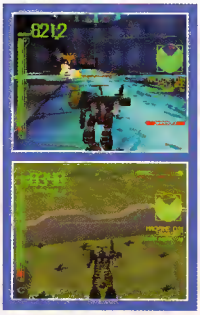
Back Weapon L: M118-TD Magazine
Back Weapon R: WC-01QL Laser Cannon
Arm Weapon L: L5-99-MOONLIGHT
Arm Weapon R: WG-MG500/E
Option Parts: All except SP-ABS, SP-SAP, SP-M/AUTO, and SP-MAW

Color Scheme: General
Red: 16, Green: 16, Blue: 00

Grade: FINE

Performance
Armor Points: 8348
Weight: 6415
Price: 1,186,200



For a reverse-joint leg type Core, Crusher can move at a decent clip and put up a good fight against almost any enemy. The energy machine gun is always a versatile weapon, with a good rate of fire and speed to target. The Moonlight Laser Blade is, as ever, the best choice of left-hand weapon in the game. And as always, the WC-01QL Laser Cannon is an extremely popular back weapon, for its heavy damage and ability to immobilize opponents as you continue to pummel their stunned Cores. Joshua has opted for the magazine part to round out his selection, which boosts the ammo of the machine gun from 500 to 600, and the Laser Cannon from 80 to 96. This is a wise move, since machine guns tend to burn through ammunition at a rapid rate. In my test battles with Crusher, it held up admirably against a wide variety of Cores.

VAMPIRE HUNTER D

SWEEPSTAKES

What better way to celebrate the release of Jaleco's new PlayStation action/adventure game *Vampire Hunter D* than with a sweepstakes? (Get it? Vampires? Stakes?) Oh, never mind; let's just take a look at those prizes!

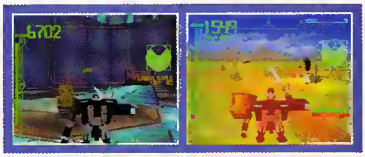
Here's another speedy Core, accompanied by the two most powerful all-around weapons in the game, the Karasawa Laser Rifle and the Moonlight Laser Blade. Christopher has thrown in a magazine to boost the Karasawa's somewhat limited ammo amount from 50 to 60. Seriously, though, if it takes more than 50 shots from the 'Sawa to finish an opponent, you need to practice your aiming techniques...a lot. The only flaw in this Core is its low, low Armor Points. If you don't finish the opponent fast, you won't last very long, but then again, the Karasawa is perhaps the best weapon is the game for shaving another Core's Armor from full to nothing in a matter of seconds. Against a slow-moving Core, Shape Shifter is practically unbeatable. Another speedy Core like Epyon, though, could give Shape Shifter a real fight.



Armored Core 2 Designs

To celebrate the arrival of *Armored Core 2* for the PlayStation 2, I've put together a couple of Cores with the new game to give you a taste of what's in store. I've got one "old school" Core and one that takes advantage of some of the cooler new stuff in the game. Enjoy!

Because *Armored Core 2* contains virtual carbon copies of some of my favorite parts from the original series, like the HD-06-RADAR head, Karasawa Laser Rifle and Moonlight Laser Blade, I thought it's be fun to "port" over my old standby Core, Zipper, using the closest equivalent *AC 2* parts. This was relatively easy, since the EHD-WACS head unit looks exactly like the old RADAR head...and the Karasawa and Moonlight are in the game! Zipper had to be slowed down some due to the stricter weight restrictions in the new game; it's sporting heavier legs to compensate for the bulky Karasawa and the best internal gear money could buy. I noticed that the Karasawa seems to have been slowed down an awful lot, to the point where the slow-moving drones in the AC Test arena were outrunning its blasts. It didn't prove to be a problem in the missions, but I miss the old rapid-fire model. I also played around with the custom coloring utility, which allows you to color five areas of each major body part on your Core. This makes for some radical designs, as evident in Zipper's sporty new red, yellow, white and green look.

Bean is a power Core, a style that is made even more fun by the wide variety of powerful dual back-mounted weapons in *AC 2*. There are dual plasma cannons, chain guns, several different types of missile launchers and even an orbital weapons platform! I've chosen a powerful Bazooka for Bean's arm weapon and back-mounted dual Chain Guns. Rather than equipping a Laser Blade, I opted for one of the new Energy Shields, because Bean is just too big and slow to be efficient with a melee weapon. The shield allows Bean to deflect some of the damage done to it, making this high-AC Core even more formidable—especially since both of its weapons are solid ammo types, so the shield is the only draw on energy reserves when on the ground. Playing from the ground is the way to go with Bean, since flying is a huge stress on energy levels. The strategy with a Core like this is to get the enemy in your sights and keep him there as you alternate bursts of Chain Gun fire with devastating Bazooka rounds. Turn on the E-Shield whenever the opponent sends fire your way.

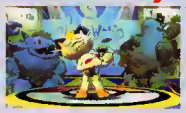
Pokémon at Space World

Serebii Giveaway

The world's rarest Pokémon, Serebii (sometimes spelled Seleby), made its first authentic appearance at Nintendo's annual Space World expo, which was held in Japan from August 25 to 27. This was the real thing: the first public trading of Pokédex entry number 251 without the use of the Game Shark or other unnatural tampering. Kids who mailed in postcards requesting Serebii prior to the show were given Serebii present tickets, redeemable at Serebii present machines scattered throughout the show floor. Using these machines, Pokéfans were able to plug in their *Pokémon Gold* or *Silver* cartridges and download Serebii directly. An interesting side note to the story is that each Serebii came pre-named, with one of two appellations: "Space" or "World." When Mew was given away, only one name was given: "Makuhari," in honor of the convention hall hosting the event.

Meowth Party



The main event at Space World was the unveiling of Nintendo's next-generation game consoles, the Game Cube and the Game Boy Advance. Oh, Nintendo 64, we hardly knew ye. Being the big teases they are, the folks at Nintendo cobbled together a mouth-watering display of images starring stupendously popular franchise characters including Mario, Luigi, Link, Samus and Meowth...then proceeded to add disclaimers stating that all graphics are meant merely to demonstrate what the Game Cube *might* be capable of, *if* they ever made games featuring these characters, and that the images themselves weren't from actual games, and if any of the pictures were from games they weren't talking, no sirree bob. After listening to too much of this double talk, you will begin to doubt your very existence, so just accept the picturesque "Meowth Party" images for the eye candy they are and ponder the mysteries of how Meowth plays the guitar without an opposable thumb.

Pokémon Crystal

The most surprising Pokémon announcement at Space World was *Pokémon Crystal*, a new Pokémon game that will be used in conjunction with Nintendo's Mobile Adapter GB. The general consensus seems to be that *Pokémon Crystal* is the true name of the previously-rumored *Pokémon X* project and will use Nintendo's Mobile Adapter to connect Game Boys to cellular phones. It will most likely serve as a companion piece, rather than a true sequel, to *Pokémon Gold* and *Silver*. The Japanese release date for both the game and the adapter is December 14, 2000.

Pocket Monster Stadium Gold, Silver, Crystal

Pocket Monster Stadium Gold, Silver, Crystal (hopefully a name change is imminent), the follow-up to *Pocket Monster Stadium 2* (*Pokémon Stadium* in the U.S.), was also shown at Space World. The new Nintendo 64 game integrates all 251 Pokémon into the tournaments and will be compatible with all known versions of *Pokémon*, including the newest Pokémon game on the horizon, *Pokémon Crystal*. New mini-games and gameplay modes have been added—and with the inclusion of Factor 5 speech compression, we hope and pray that the announcer from *Pocket Monster Stadium 2* will add at least a sixth full-length sentence to his range of discourse...and that improvements in sound quality will help the Pokémon belt out war cries instead of feebly reiterating the tinny noises posing as "sounds" that emanate from the Game Boy. Exhibition matches were held during the show where Pokémon trainers used their own Pokémon from whichever cartridge they preferred (*Red, Green, Blue, Yellow, Gold, Silver, Puce, Sage, Pinstripes With Yellow Polka-Dots*...) but eventually all succumbed to the masterful tactics of Miran Fujita, a 20+ woman who also won the first annual Pokémon league tournament, stating that the key to her success was using poison. Hopefully she is referring to the game, although some of her competitors did have glazed looks in their eyes...

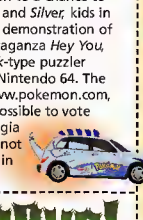
Pokémon Gold and Silver ADVENTURE TOUR

The countdown to the October 15 release of *Pokémon Gold* and *Silver* in the U.S. (yes, the date was pushed up one day) kicked off on Labor Day weekend with the *Pokémon Gold and Silver Adventure Tour*, a 30-city cross-country tour entailing Nintendo employees careening across America in Chrysler PT Cruisers souped up to look like Lugia. In addition to a chance to play English versions of *Pokémon Gold* and *Silver*, kids in targeted cities will also get a hands-on demonstration of the voice-recognition virtual pet extravaganza *Hey You, Pikachu!* and the pokéfied *Tetris Attack*-type puzzler *Pokémon Puzzle League*, both for the Nintendo 64. The tour's current schedule is posted on www.pokemon.com, but everything is not set in stone. It's possible to vote online for which cities you want the Lugia caravan to arrive at next, so hope is not lost for any unlucky kids living out in the boondocks.

POKÉMON 2000 WORLD CHAMPIONSHIP

Eight countries—Australia, Belgium, France, Germany, the Netherlands, Spain, the United Kingdom and the United States—will each select one champion to compete for bragging rights during the Pokémon 2000 World Championship to be held in Sydney Australia, from September 20 to 22. Representing the United States will be Ian Garvey, of New Hope, Pennsylvania. The event will take place in Sydney University's "Pokémon Park," which is also hosting a festive 22-day Pokémon party beginning on September 12, featuring a live Team Rocket show, trading card tournaments, video-game mayhem, Pokémon disco and glimpses of first-edition Pokémon merchandise. There's also this other thing going on down under called the Olympics, but I don't think the *Pokémon Stadium* tournaments will be part of the proceedings.



The pride of New Hope, Pennsylvania: American Pokémon champion Ian Garvey.

PIKACHU VIRUS!

If you thought all Pikachu knew was "Quick Attack" and "Thundershock" be prepared for a surprise. Pikachu's heretofore unsuspected technical skills are now glaringly evident with the spread in the U.S. of the Pikachu virus. The infection propagates via e-mail with the title "Pikachu Pokémon" and "Pikachu is your friend" in the body of the message. An animated picture of Pikachu is attached to this innocuous message that instantly corrupts your machine when executed and e-mails itself to everyone in your address book. According to reports, Pikachu destroys all the files in your Windows and System directories, forcing you to reinstall the Microsoft operating system from scratch (which you probably need to do five times a year anyway, so who cares?) and also face the hard, cold fact that maybe Pikachu is NOT your friend. Merely delete the file should it come your way and never open attachments connected to unsolicited e-mail.

Wizards of the Coast Trading Cards

Ancient Mew

Recipients of the Ancient Mew promo card given away during the first week of *Pokémon the Movie 2000: The Power of One* can use it during regular play, as long as it is kept in an opaque cardsleeve. Using the clues posted on www.pokemon.com, it's possible to decipher the arcane symbols. Here are the clues, and their answers:

1. Clue: To find out the secret name of Ancient Mew's attack, first write down the first five letters of Mewtwo's PC attack from Base Set Two. Next, write down the first letter of Charmander's biggest attack from Base Set Two. Put them together and you'll know the name of Ancient Mew's attack!
Answer: [Psych]ic + [E]mber = Psyche

2. Clue: To discover how many Hit Points Ancient Mew has, look at Diglett's Mud Slap attack from Base Set Two.
Answer: 30 HP.

3. Clue: To find out how much damage Ancient Mew's attack does, first write down how much damage is inflicted by Machop's Low Kick from Base Set Two. Next, write down how much damage is inflicted by Hitmonchan's Jab from Base Set Two. Add these two numbers together and you'll know how much damage is caused by Ancient Mew's attack.
Answer: 20 + 20 = 40

4. Clue: If you study your Ancient Mew card, you'll notice that Ancient Mew's Retreat Cost is hidden in an unlikely place. If you're having trouble finding its Retreat Cost, look at Clefable's Retreat Cost from Base Set Two. The Retreat Cost is the same for both of these Pokèmon!
Answer: 2 Energy

5. Clue: If you look carefully at your Ancient Mew card, you'll notice that Ancient Mew's attack cost is in ancient Psychic symbols.
Answer: 2 Psychic Energy

Gym Heroes

The latest and largest expansion to the *Pokémon Trading Card Game* is *Gym Heroes*, released on August 14. There are 132 new game cards, including 19 holographic rares and new card designs with an image of a Gym Leader's face on the front. Featured Gym Leaders are Misty, Brock, Lt. Surge and Erika, whose respective specializations are Water, Rock, Electric and Grass Pokèmon and have all made appearances on the *Pokémon* cartoon show. The Gym Heroes expansion will be sold in four different theme decks, each consisting of 60 cards, one rare, holofoil card, a rule book, paper counters, game coin and trading card list.

Novelty Link Cables

Kemco's novelty Link Cables include the Pikachu Link Cable, the Togepi Link Cable and add-ons in the form of *Pokémon Gold* and *Silver* starters Totodile, Chikorita and Cyndaquil. The Pikachu Link Cable comes with a detachable plastic facsimile of the omnipresent rodent and a miniature Poké Ball that slides along the length of the cable. Kemco's Link Cables are compatible only with the Game Boy Color and Game Boy Pocket systems; the connector is too small for the original Game Boy port. Although Pikachu's electrifying presence on the Link Cable doesn't actually make the connection more powerful, it makes a biting fashion statement in the high-tech world of Game Boy accessorizing that ranks right up there with other Game Boy goodies like the Worm Light, Song Boy, Boom Box Boy, Sewing Boy, Missile-Guidance System Boy, etc.

Burger King Pokémon Power Cards

Burger King's second Pokèmon promotion ran from July 15 to August 21, to commemorate the second coming of Pokèmon on the silver screen. Pokèmon Power Cards were included in every Kid's Meal and Big Kid's Meal; large plastic cards picturing a Pokèmon raised in relief. Pokèmon Power Cards can be displayed on a base and execute one of five functions.
